# ArcGIS® 9.2

## Quick Start Guide

*ArcGIS Desktop*

# 1

## Install

*If other ArcGIS® products are installed on your machine, they must be uninstalled before proceeding with the ArcGIS Desktop Evaluation Edition setup.*

- Close all applications on your computer.
- Insert ArcGIS Desktop Evaluation Edition CD 1.
- Select Install ArcGIS Desktop and ArcGIS Desktop Extensions Evaluation.
- Click Install.
- Follow the installation instructions.

  Note: You must select the Complete or Custom installation type to install the ArcGIS Desktop extensions.

# 2

## Register

- Select Register Now.

  Note: To register at a later time, click Exit. When you want to register, navigate to Start > Programs > ArcGIS > Desktop Administrator, select the Register Single Use and Extensions folder, and click Register Now.

### Automatic Registration

*This is the recommended method and requires the computer to be connected to the Internet.*

- Click I have installed ArcView/ArcEditor and need to register the software.
- Click Register now using the Internet.
- Follow the installation instructions.

  Note: If you have already registered and received an authorization file in the *.esu9 format, select I have received an authorization file from ESRI and am now ready to finish the registration process.

### Manual Registration

*Use this method if the computer you are using does not have an Internet connection.*

- Select Register by e-mail or Fax or mail your registration. Alternatively, from another machine that has an Internet connection, browse to service.esri.com, select the Product Registration link, and follow the instructions.
- You will receive an authorization file in a *.esu9 format. Save this file to your machine.
- Open the Registration Wizard from the Desktop Administrator and choose I have received an authorization file from ESRI and am now ready to finish the registration process.
- Browse to the saved authorization file to complete the registration.

# 3

## Tutorials

- Insert ArcGIS Desktop Evaluation Edition CD 3.
- Select Install Tutorial Data.

  Note: The default installation location for the tutorial data is C:\arcgis\ArcTutor.
- Follow the installation instructions.

  Note: You must select the Complete or Custom installation type to install tutorial data for the ArcGIS Desktop extensions.

CD 3 also includes tutorial multimedia presentations that will walk you through some of the tutorials.
