# Frequently asked questions (FAQ)

**Is all of the data provided on Data and Maps freely redistributable?**
No. Much of the data is provided by multiple, third party data vendors under license to Esri for inclusion on Data and Maps specifically for use with ArcGIS software.

**What do the "Yes" or "No" values in the last column "Redistribution" of the Redistribution Rights table above mean?**
Each data vendor has its own data licensing policies and may grant varying redistribution rights to end users. Consult the Redistribution Rights classifications below to determine the redistribution rights for a dataset provided on Data and Maps. As used herein, "Geodata" shall mean any digital dataset consisting of geographic data coordinates and associated attributes.

"**No**" - Internal Use Only. No redistribution rights are granted by the data vendor and the data is for the end user's own internal use only.

"**Yes 1**" - Redistribution rights are granted by the data vendor for hard-copy renditions or static, electronic map images (for example, .gif, .jpeg, and so on) that are plotted, printed, or publicly displayed with proper metadata and source/copyright attribution to the respective data vendor(s).

"**Yes 2**" - Geodata are redistributable with a Value-Added Software Application developed by Esri Business Partners on a royalty-free basis with proper metadata and source/copyright attribution to the respective data vendor(s).

"**Yes 3**" - Geodata are redistributable without a Value-Added Software Application (such as, adding the sample data to an existing, [non]commercial dataset for redistribution) with proper metadata and source/copyright attribution to the respective data vendor(s).

"**Yes 4**" - Public domain data from the U.S. government are freely redistributable with proper metadata and source attribution.

**Are there any legal terms and conditions I need to be aware of under this license, to use the data provided on Data and Maps?**
Yes. The terms and conditions below apply to all the datasets provided on Data and Maps.

In compliance with Federal Geographic Data Committee (FGDC) metadata standards, Esri has attempted to practice proper metadata methodologies by providing any data source information, descriptions, and file names to assist in this effort.
