

ESRI Data & Maps 2009 Data Update

In previous years, the ESRI Data & Maps Update has included only datasets from the Data & Maps collection that had been updated since the last ArcGIS software release. Users then had to overwrite their Data & Maps footprint with the new files. To make things easier, this year, the Data & Maps Update DVD is the complete collection of data present on the Data & Maps and StreetMap North America DVD, most recently released as part of the ESRI Data & Maps 9.3.1 Media Kit, with over 80 of those datasets updated. The datasets updated to their current 2009 versions include the U.S. Tele Atlas data and other U.S. data as well as Mexico, StreetMap North America, Europe, and World data. In addition, minor corrections and enhancements are being made to many of the other datasets. The disk also contains all .mxds, .pmfs, .lyrs, and .html help files from the Data & Maps 9.3.1 DVD, updated to work with the current datasets.

Updated datasets

Europe

- Cities
- Countries
- Ferries
- Major Lakes
- Major Rivers
- Major Roads
- NUTS 0 Demographics
- NUTS 1 Demographics
- NUTS 2 Demographics
- NUTS 3 Demographics
- Places
- Provinces Level 1
- Provinces Level 2
- Provinces Level 3
- Railroads
- Railroad Stations
- Roads
- Urbanized Areas
- Water Bodies

Mexico

- Cities
- Contours
- Municipalities
- Rivers and Streams
- Roads
- States
- Urban Areas
- Water Bodies

StreetMap North America

- Airports
- City Areas
- City Points
- U.S. Counties
- Highways
- Institutions
- Interstate Highways
- Lakes
- Large Area Landmarks
- Major Roads
- Parks
- Railroads
- Recreation Areas
- Retail Centers
- Rivers
- State and Province Boundaries
- States and Provinces
- Streets
