ESRI Homeland Security GIS Summit

The Geographic Approach™: A Framework for Mission-Critical Decision Making

Now more than ever, it's key to know how to meet the mission and bridge the gap between stretched resources and high expectations. At the ESRI Homeland Security GIS Summit, attendees will explore how to accomplish these goals with geographic information system (GIS) technology. The conference is designed so that you return to work equipped to achieve success in your specific mission areas.

Who Should Attend

The summit is for personnel in all levels of government as well as public safety and the private sector. Whether you're a commander, first responder, GIS specialist, or executive, the summit is a great resource.

Why Attend

- See how to use GIS in homeland security to optimize investments in technology and do more with less.
- Discover how GIS integrates information systems and increases collaboration for better decision making.
- Hear exactly how the top public safety professionals succeed.
- Determine how you can map out proven strategies and show your organization how to implement them.
