

U.S. Army Center for Health Promotion and Preventive Medicine

U.S. Army Center for Health Promotion and Preventive Medicine (USACHPPM) is a linchpin of medical support to combat forces and of the military managed care system. It provides worldwide scientific expertise and services in clinical and field preventive medicine, environmental and occupational health, health promotion and wellness, epidemiology and disease surveillance, toxicology, and related laboratory sciences. It supports readiness by keeping soldiers fit to fight, while also promoting wellness among their families and the federal civilian workforce.

Many health issues that CHPPM engages around the world are spatial in nature. Noise levels near aircraft runways, concentrations of disease carrying arthropods, and groundwater contamination near artillery ranges are but some issues that share a spatial component that affect the health of the DoD and surrounding civilian populations. GIS is a tool that decision makers at USACHPPM have been utilizing over a decade for these and other spatial issues.
