

# Geospatial Information Superiority

Esri® Solutions for Land, Maritime, and Intelligence Operations

# Geospatial Knowledge = Information Superiority

Esri® geospatial technology gives military and intelligence organizations the power to quickly answer questions, solve problems, and make informed decisions. **ArcGIS® for the Military—Land Operations**, **ArcGIS for the Military—Maritime Operations**, and **ArcGIS for Intelligence** supply the core technology and resources to simplify creating and delivering geospatial information to decision makers.

Each provides the following:

- **Servers and portals** to manage, analyze, and share geospatial information including imagery
- **Ready-to-use basemaps** to rapidly visualize areas of operation
- **Operational map templates** to plan missions
- **Application templates** to simplify development of web-based and mobile solutions

ArcGIS—customized for military and intelligence operations—puts up-to-date geospatial knowledge into the hands of warfighters, intelligence analysts, and decision makers. This helps your organization conduct analysis; plan missions; monitor operations; and, ultimately, achieve information superiority.

Esri technology speeds the flow of geospatial information from the operations center to the warfighter.

Read more about ArcGIS for the Military and ArcGIS for Intelligence at [esri.com/defense](http://esri.com/defense).

## Data Management/Provisioning

Manage, analyze, and share sensor data and other geospatial information using **server software** configured for land, maritime, and intelligence operations. This provides on-demand access to geospatial information.

## Planning and Analysis

Quickly create maps and other information products using a variety of **operational map templates**. The templates contain the components needed to create operational overlays, saving your organization time when conducting planning and analysis.

## Situational Awareness

Monitor and manage forces, threats, and events with an **operational picture** that users define to fit their missions. All command echelons see a near real-time, synchronized view to help make faster, smarter decisions and fight from the same map.

## Mounted/Dismounted Mobile Operations

Use **application templates**, such as Esri vehicle commander and squad leader, to build mobile solutions that help troops navigate in the field and collect, report, relay, and receive intelligence and situation information. Warfighters armed with mobile devices can contribute information that helps commanders make informed decisions.

Understanding our world.

Esri inspires and enables people to positively impact their future through a deeper, geographic understanding of the changing world around them.

Governments, industry leaders, academics, and nongovernmental organizations trust us to connect them with the analytic knowledge they need to make the critical decisions that shape the planet. For more than 40 years, Esri has cultivated collaborative relationships with partners who share our commitment to solving earth's most pressing challenges with geographic expertise and rational resolve. Today, we believe that geography is at the heart of a more resilient and sustainable future. Creating responsible products and solutions drives our passion for improving quality of life everywhere.
