Data and wealth ranking provided by Esri, ©2015. All rights reserved. ZIP codes with a population of less than 10,000 are not included.

ESRI'S WEALTH RANKINGS ABOUT THE LIST

Esri's list of the wealthiest areas is compiled from a number of indicators of affluence that include average household income and average net worth. Wealth is really more than above-average household income. The concept of wealth also includes the value of material possessions and resources. Esri captures both income and the accumulation of substantial wealth, or the abundance of possessions and resources, in its identification of the wealthiest areas in the country. Top ranks reflect both accumulated wealth and the rate of increase in wealth (as measured by current income).
