

Esri® Solutions for Military Operations and Intelligence

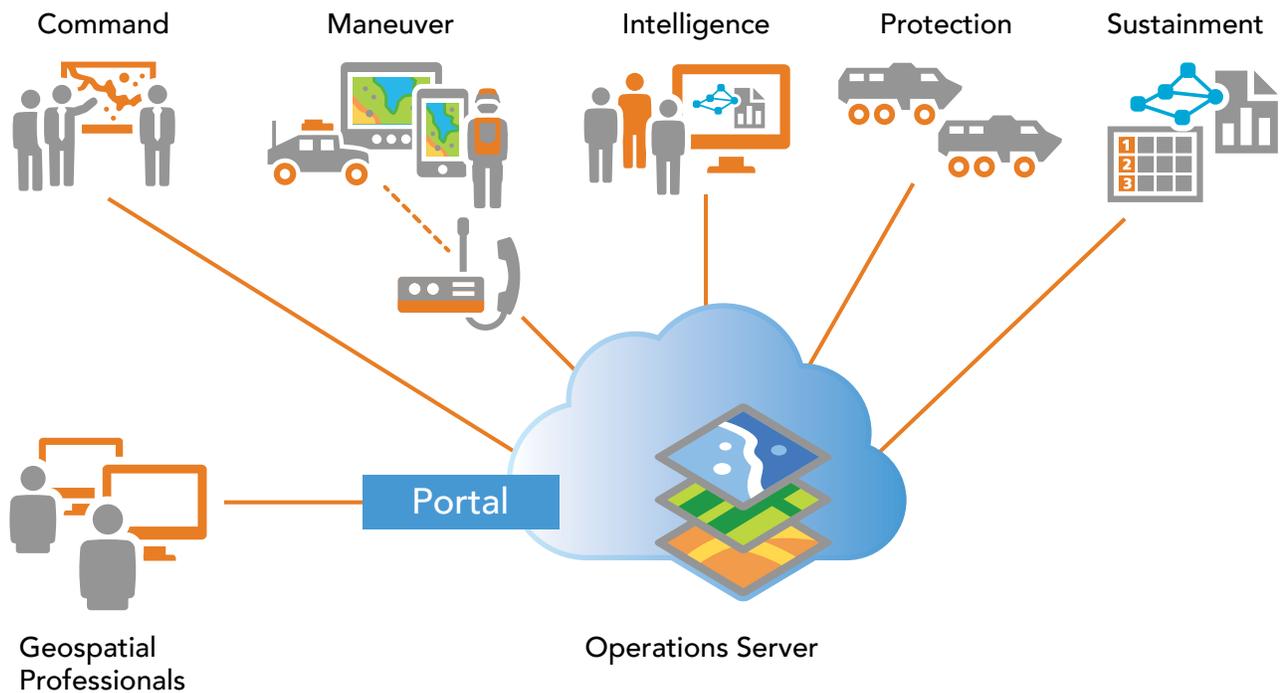

Geospatial Knowledge = Information Superiority

Esri® geospatial technology gives geospatial professionals and analysts in military and intelligence organizations the power to quickly answer questions and solve problems, to help commanders make informed decisions. **ArcGIS® for the Military—Land Operations, ArcGIS® for the Military—Maritime Operations, and ArcGIS® for Intelligence** supply the core technology and resources needed to simplify creating and delivering geospatial information to decision makers by providing

- **Operations server or portal** to manage, analyze, and share geospatial information, including imagery
- **Maps** to rapidly visualize areas of operation
- **Tools and widgets** to analyze information
- **Applications** to simplify development of web-based and mobile solutions

ArcGIS—customized for military and intelligence operations—puts up-to-date geospatial knowledge into the hands of warfighters, intelligence analysts, and decision makers. This helps your organization conduct analysis; plan missions; monitor operations; and, ultimately, achieve information superiority.

Esri technology speeds the flow of geospatial information from the operations center to the warfighter, whether connected (portal) or disconnected (operations server).

Analyze Information

Manage, analyze, and share sensor data and other geospatial information using tools and widgets configured for land, maritime, and intelligence operations. This provides on-demand access to geospatial information.

Plan Operations

Quickly create maps and other information product overlays using a variety of workflows. Quickly serve overlays, saving your organization time when conducting planning and analysis.

Conduct Operations

Use maps to monitor and manage forces, threats, and events with an operational picture that users define to fit their missions. All command echelons see the same near real-time, synchronized view to maintain situational awareness.

Maintain Systems

Use applications, such as Esri Vehicle Commander and Esri Squad Leader, to build mobile solutions that help troops navigate in the field and collect, report, relay, and receive intelligence and situation information. Warfighters armed with mobile devices can contribute information that helps commanders make informed decisions.

Understanding our world.

Esri inspires and enables people to positively impact their future through a deeper, geographic understanding of the changing world around them.

Governments, industry leaders, academics, and nongovernmental organizations trust us to connect them with the analytic knowledge they need to make the critical decisions that shape the planet. For more than 40 years, Esri has cultivated collaborative relationships with partners who share our commitment to solving earth's most pressing challenges with geographic expertise and rational resolve. Today, we believe that geography is at the heart of a more resilient and sustainable future. Creating responsible products and solutions drives our passion for improving quality of life everywhere.
