

# See What's Coming Down the Pipe from Esri

Visit Booth 402

## Know Your Networks

Cut the complexity in knowing your pipe from the wellhead to the meter. Introducing the **Utility & Pipeline Data Model (UPDM)** from Esri. Improve your workflow, scalability, and performance with UPDM. Visit booth 402 to learn how to download this moderately normalized data model, now available online.

## While You're at Booth 402

Check out the latest on the ArcGIS® Location Referencing for Pipelines extension in development now. When released, this will make your day easier as you perform

- Pipeline data management.
- Linear referencing.
- Coordinate referencing.

## New to GIS?

Stop by booth 402 to learn more about how Esri meets your workflow needs.
