PRODUCT INFORMATION

Trimble Nomad

The Trimble® Nomad™ series offers all-in-one convenience in a lightweight device engineered for superior performance in harsh outdoor environments. Trimble Nomad handhelds are productivity-focused GIS data collection devices offering full compatibility with ArcPad and a choice of configurations to match your existing workflow.

Stand-alone performance

The Trimble Nomad Handheld has a powerful 806 MHz processor, 128 MB of RAM, up to 1 GB of Flash storage, integrated wireless capabilities, and a high-resolution VGA display. With a variety of configuration options including integrated GPS, integrated digital camera, and an integrated laser bar code scanner, the Trimble Nomad Handheld provides an all-in-one solution for field data collection and inspection activities.

Built for extremes

The Trimble Nomad Handheld will meet and surpass your expectations for ruggedness and performance in all conditions. You don't need to compromise on ruggedness by carrying nonrugged peripherals or connecting to additional equipment via exposed expansion ports. The Nomad series meets the rigorous MIL-STD-810F military standard for drops, vibration, humidity, and extreme temperature. It also comes with an IP67 rating, meaning that the Trimble Nomad Handheld is completely sealed from dust and can survive submersion in up to one meter of water for 30 minutes.

Onboard image capture and bar code options

Capturing digital photographs in the field has never been so easy. Using the optional integrated camera, images are stored directly on the device and are available straight away to be used by your field software. Reduce the time spent on manual data entry by using the optional integrated bar code scanner to automate data collection and asset tracking workflow.

Part of the Trimble product family

As part of Trimble's family of GPS solutions, the Trimble Nomad series is fully compatible with ArcPad. Existing customers can continue to use the same streamlined workflows and DGPS infrastructure. Office processing and postprocessing capability is provided with Trimble GPS Analyst™ extension for ESRI ArcGIS. Integrate your data collection workflow with the Trimble Nomad Handheld. Because it's a Trimble solution, you have a single point of contact for service and support, and you can rest assured that you are equipping your mobile workforce with the quality and reliability that Trimble represents.
