Product-Specific Trade-In Guidelines

- Trade-in product cannot be applied against the purchase of GeoXM handheld.
- Trade-in program does not apply to GeoCollector Series offers.
- The GeoXH receiver requires Trimble's GPS Analyst for ArcGIS® Desktop software. Trimble's GPS Analyst for ArcGIS Desktop software is also highly recommended for the GeoXT to guarantee the submeter accuracy.
- GeoXH/GeoXT handhelds can be purchased separately or bundled with ESRI® software.
- **All orders that involve this trade-in program must be processed with a credit card in the United States.**
- The trade-in unit must be intact and operational.
- This trade-in discount cannot be combined with any other offers or discounts.
- Only one trade-in credit can be applied for each order; therefore, multiple trade-ins must be submitted as multiple single orders.

-
-
- All items traded in for credit must be received by Trimble within 30 days from the date the new equipment (which the trade-in equipment is to be credited against) is shipped or within 30 days of the order being placed for trade-in credit, whichever is latest. If the equipment is not received by Trimble within the appropriate time, the trade-in credit will be forfeited and the credit card on file will be processed for the full amount.
 - Please call Neil Tomlinson at 909-793-2853, extension 1-1340, or Dean Garner at 909-793-2853, extension 1-4441, for any questions for quotes.
