

Welcome to Esri's Software Export Control Classification Number (ECCN) Matrix

This portion of the Esri web site is to provide information regarding the export control classification of Esri products. This information is specific to our products and is to be used in conjunction with the Export Administration Regulations (EAR) to determine applicable restrictions which may be required for exporting, reexporting, shipping documentation, record keeping, or postshipment reporting.

If you are exporting or reexporting Esri products, U.S. export controls apply and it is your responsibility to ascertain your compliance obligations. Please note that U.S. export controls remain in force as Esri products and technology are reexported to different users and locations around the world. There are civil and criminal penalties for violating U.S. export laws which include heavy fines and/or loss of export privileges.

NOTE: Please note that end users, end use, and country of ultimate destination may affect your export licensing requirements. You are ultimately responsible for exporting Esri products in accordance with the EAR. We encourage you to consult the Bureau of Industry and Security (BIS) (<http://www.bis.doc.gov>) and any other appropriate sources before you export or reexport Esri products.

Esri is not inviting reliance on this information and is for general informational purposes only. Esri makes no representation as to the accuracy or reliability of the classification information contained in this site. All export classification information contained in this matrix is subject to change without notice.

If you have any questions on any information regarding this list, please contact us at esriexport@esri.com.
