

# Tapestry™ Segmentation

Esri's **Tapestry™ Segmentation** system divides U.S. residential areas into 65 distinctive segments based on socioeconomic and demographic characteristics to provide an accurate, detailed description of U.S. neighborhoods. **Tapestry Segmentation** can help you to identify your best markets, find the most profitable consumer types, tailor marketing messages to fit your audience, and define product and service preferences. Here's a brief description of a Tapestry segment.

## 15—Silver and Gold

**Segment Code**—15

**LifeMode Summary Group**—L5 Senior Styles

**Segment Name**—Silver and Gold **Urbanization Summary Group**—U7 Suburban Periphery I

### Demographic

With a median age of 60.1 years, *Silver and Gold* residents are the second oldest of the Tapestry segments. More than 70 percent are aged 55 years or older. Most residents have retired from professional occupations. Half of the households are composed of married couples without children. This segment is small, less than 1 percent of all US households; however, annual household growth is 2.35 percent since 2000. Residents of these neighborhoods are not ethnically diverse; 93 percent of them are white.

### Socioeconomic

These are wealthy, educated seniors. Their median household income is \$67,806, and their median net worth is \$331,108. Fifty-six percent of the households still earn wages or salaries, half collect Social Security benefits, 63 percent receive investment income, and 35 percent collect retirement income. Labor force participation is 44 percent, well below the US level. The percentage of those who work from home is higher than the US worker percentage; nearly one-fourth of employed residents are self-employed, also higher than the US level.

### Residential

Their affluence enables them to relocate to sunnier climates. More than 60 percent of these households are in the South, mainly in Florida. One-fourth are located in the West, mainly in California and Arizona. Neighborhoods are exclusive, with a median home value of \$274,320 and a homeownership rate of 83 percent. *Silver and Gold* ranks second of the Tapestry segments for the percentage of seasonal housing. Because these seniors have moved to newer single-family homes, they are not living in the homes where they raised their children.

### Preferences

*Silver and Gold* residents have the free time and resources to pursue their interests. They travel domestically and abroad including cruise vacations. They are also interested in home improvement and remodeling projects. Although they own the tools and are interested in home improvement and remodeling projects, they are more likely to contract for remodeling and housecleaning services. Active in their communities, they join civic clubs, participate in local civic issues, and write to newspaper or magazine editors. They prefer to shop by phone from catalogs such as L.L. Bean and Lands' End.

Golf is more a way of life than just a leisure pursuit. They play golf, attend tournaments, and watch The Golf Channel. They also go to horse races, bird watching, saltwater fishing, and power boating. They eat out, attend classical music performances, and relax with a glass of wine. Favorite restaurants include Outback Steakhouse, Cracker Barrel, and Applebee's.

*Silver and Gold* residents are avid readers of biography and mystery books and watch numerous news programs and news channels such as Fox News and CNN. Favorite nonnews programs include detective dramas.
