

Conservation, Humanitarian, and Sustainable Development Events and Activities Guide

The Esri User Conference offers a vast number of presentations and events with hundreds of topics covered. To help you find your way to the Conservation, Humanitarian, and Sustainable Development sessions and events, we have prepared this summary guide to support your agenda planning.

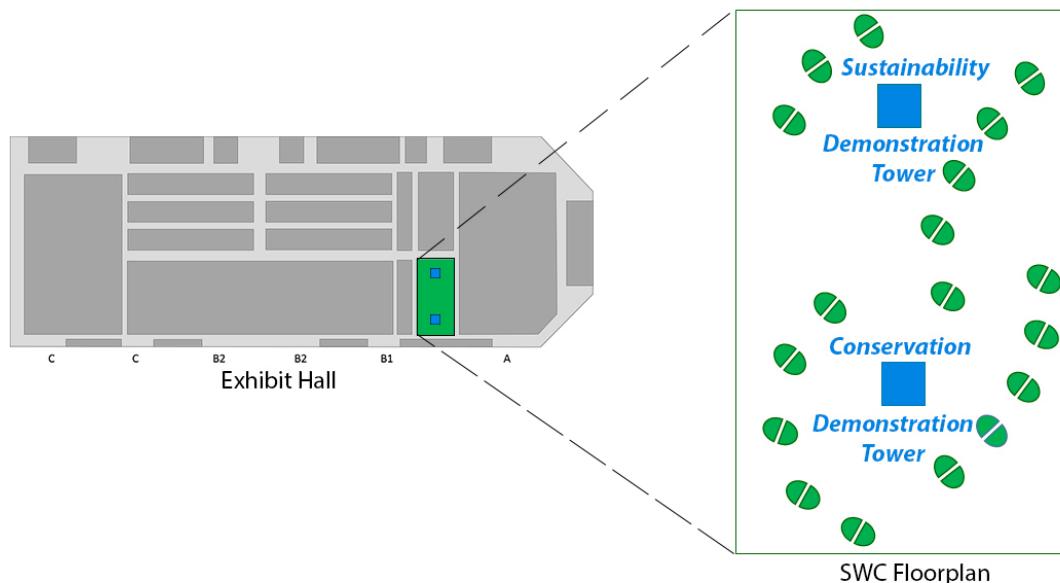

Sustainable World Community Showcase

Ground Level Exhibit Hall B1, SDCC

Tuesday, June 28 9:00 AM–6:00 PM
Wednesday, June 29 9:00 AM–6:00 PM
Thursday, June 30 9:00 AM–1:30 PM

Visit the Sustainable World Community (SWC) to experience how GIS provides solutions for conservation, humanitarian assistance, and sustainable development. Join Esri staff and over 35 special guests from nonprofits, NGO's, and international organizations. These organizations are using geography to make the world a better place by providing humanitarian assistance, protecting wildlife habitats, conserving oceans and waterways, fighting climate change, and much more. The showcase will feature both a **Sustainability and Conservation Demonstration Tower** where leading organizations will present on their advanced work in GIS as well as share story maps for a geographically referenced journey of their important work. The Demonstration Towers will also feature Esri technical demonstrations on the advancement of the ArcGIS Platform to serve the Sustainable World Community.
