Visit the Environment Showcase to see GIS solutions for all aspects of the environment. The showcase will feature the work of government agencies, research institutions, nongovernmental organizations (NGOs), nonprofits, and commercial companies that conserve, restore, and sustainably manage the natural environment using science-based strategies. The Environment Showcase is also home to humanitarian organizations that provide assistance to communities in need as they work to mitigate and adapt to a wide variety of environmental influences such as the effects of climate change, resource development, population growth, and human conflict.

The Environment Showcase hosts two demo theaters, the Environment Demo Theater and Conservation Demo Theater. Gain insight from real-world success stories. Search the online agenda to add sessions to your planner. Come early to hear from GIS innovators, world leaders, and industry trendsetters.
