

Gas and Pipeline Industry Q&A Series

What are the requirements for someone to be able to do this?

The requirements to run ModelBuilder are basically the core ArcGIS product. Some tools do require extensions, and data is required. Homeland security makes it very difficult to get a valid dataset that represents the information that goes into these business problems, and have a dataset that we can share with the public.

Thank you very much Tom, and for future inquests, Tom's e-mail address is tdewitte@esri.com.
