HP ProLiant Servers packaged with ArcGIS® for Server Enterprise Advanced

A special promotional offer for US customers only.

There are two server packages available, one with a four core server and one with an eight core server. An option for a Microsoft® SQL Database Server is also available.

ArcGIS for Server Enterprise Advanced is designed for GIS organizations that want to provide a central, server-based GIS for distributing GIS services across the organization or over the Internet. It provides spatial data management, visualization (both 2D and 3D), spatial analysis and modeling, and a configurable mobile GIS application. The Advanced edition also includes four advanced analysis extensions (ArcGIS 3D Analyst™, ArcGIS Spatial Analyst, ArcGIS Network Analyst, and ArcGIS Geostatistical Analyst) at no additional cost.

ArcGIS for Server Enterprise Advanced requires a database management system (DBMS) server. A Microsoft SQL Database Server option is available on page 4 of this offer.

If you do not see the exact server configuration you are looking for, please call your local Esri regional office or Dean Garner at 909-793-2853, ext. 1-4441, for custom solutions.
