## Federal Small Business Booth Walk Wednesday, June 29 1:30-2:30 PM

Esri Federal Small Business Specialty (FSBS) Partners have done amazing work to develop, deploy and integrate their solutions and services with the latest Esri technology. They help Esri's US Federal Government customers to realize the full value of the ArcGIS Platform with WebGIS, enabling customers to light up their entire organization. This one hour booth walk will be conducted in two concurrent tracks.

**Track #1**

**R&K Solutions #2336** GoRPM is a comprehensive strategic planning solution used to aggregate and analyze all types of real property and facilities data - incorporating map and floor plan visualizations, automated reporting, and intuitive dashboards with Key Performance Indicator (KPI) visibility to improve operations, identify cost saving opportunities, and inform decision makers across your organization.

**Voyager #2233** Voyager Search will be demonstrating their out of the box spatially enabled, enterprise search solution. As an on premises or hosted solution, Voyager allows organizations to seamlessly search across all of their data including ArcGIS Online, Portal for ArcGIS as well as over 1700 spatial and non-spatial file types.

**Zerion #2316** Zerion helps you collect, refine, and report on data so you can focus on what matters most. Data that is captured in the field can now be transformed and reported on faster and more accurately than ever before.

**PenBay #2217** PenBay solutions Commercial Off The Shelf products collate information from across the organization using location as the organizing principle to help our customers better see, manage, and protect their facilities. All PenBay products are built on the ArcGIS Platform.

**Blue Raster #2215** Blue Raster builds intuitive web and mobile applications that help our clients solve, clarify, and visualize many of the world's critical challenges. By leveraging the latest in Esri

products and web technologies, we are making our applications faster, more powerful, and easier to use.

**Critigen #209** Critigen unlocks the power of location by integrating spatial relationships and technology with business data and processes, leveraging our unique innovations to revolutionize decision-making. We'll present our Fish Futuring WebGIS solution for the US Fish & Wildlife Service, and Critigen's Energy InSite: a WebGIS integration of smart meter data stored in OSIsoft's PI System to monitor and act upon energy consumption.

## Track #2

**FireWhat #2343** FireWhat is a Geographic Information Systems technology company, mapping emergency incidents and tracking responders in and out of the field. FireWhat's solutions range from mobile GIS labs supporting large wildfire incidents to Incident Dashboard, a new web GIS app that provides the most current and detailed information on wildfires to public and commercial customers.

**VESTRA #2545** Since 1988, VESTRA Resources, Inc. has been an industry leader in Enterprise GIS design, customization and implementation. We specialize in consulting with government and private industries nationally. We'll be showcasing our GeoSystems Monitor – the best real-time GIS monitoring system used by many large clients worldwide.

**ClearTerra #2619** ClearTerra will present its [LocateXT technology](#), which extends the ArcGIS platform to work with Unstructured Data. The [LocateXT ArcGIS for Server](#) product enables LocateXT capabilities to be delivered as geoprocessing services that can be accessed from lightweight web-mapping clients, such as Web App Builder.

**PTFS #2504** PTFS, a provider of Geospatial Content Management Systems (GeoCMS), will showcase their enhanced Knowvation GS and Droneware offering, demonstrating the critical role the products can play in mission areas such as Disaster and Emergency Response, Transportation/Infrastructure and Intelligence. Come see how the software can help organizations manage their valuable geospatial data.

**Landworks #2404** LandWorks is an Esri Gold Business Partner providing ESRI Platform focused solutions and services that manage land rights. LandWorks Property Management (LPM) offers a true commercial-off-the-shelf solution that can support the land right and land asset functions of any Federal agency or Service Branch. LPM manages land assets linked to Mineral Rights, Installation, Cadastral data or any linear asset including highways, pipelines and utility infrastructure.

**GISinc #2317** GISinc is a proud Platinum Partner of Esri with nearly 200 fanatical GIS professionals and a portfolio of over 60 active GIS projects many of which are WebGIS. Whether it's mobile or browser based...API or SDK...indoor tracking or weapons safety...or even the entire web solution stack...GISinc's talent delivers!
