Change Notes

Market Data are now projections for 2025 (previously 2023). Population projections at the national level declined by 2.27% compared to former estimates; this difference is attributed to updates to UN data based on input data from the Haut-Commissariat au Plan du Maroc. Utilization of updated input data from official statistics has led to deviations in Marital Status. The Purchasing Power projection in national currency for 2025 shows a significant upward trend due to inflation and economic growth.

No changes were made to these settlement points since the last MBR release.
