## Change Notes

Market Data are now projections for 2025 (previously 2023). Unemployed Population is shown for 2024 (previously 2022). Population projections at the national level declined by 1.59% compared to former estimates; this difference is attributed to updates to UN data based on input data from the Statistics Mauritius Office. Utilization of updated input data from official statistics has led to deviations in Marital Status. The Purchasing Power and Consumer Spending projection in national currency for 2025 shows a significant upward trend due to high inflation and economic growth. Please note that the deviations observed in the values for product groups CS13 to CS16 this year are due to a redefinition of these categories. Due to these changes, comparisons with the last edition are not possible in these groups.

## Other Data Notes
