Change Notes

Market Data are now projections for 2026 (previously 2024). Unemployed Population data is shown for 2025 (previously 2023). Population projections at the national level declined by 0.47% compared to former estimates; this difference is attributed to updates to United Nations data that is based on input data from the National Statistics Office of Georgia. The use of Census 2024 data from official statistics has led to deviations in Marital Status and Unemployed Population data. The Purchasing Power projection in national currency for 2026 shows an upward trend due to a revision of economic data.

No changes were made to the settlement points since the last MBR Data release.
