Change Notes

Market Data are now projections for 2026 (previously 2024). Population projections at the national level increased by 22.02% compared to former estimates; this difference is attributed to updates to United Nations data that is based on input data from the National Center for Statistics and Information of Oman. The use of updated input data from official statistics, together with the significant increase in the overall population, has led to deviations across all related variables. The Purchasing Power projection in national currency for 2026 shows a downward trend due to a revision of economic data.

No changes were made to the settlement points since the last MBR Data release.
