Release: February 2026

Data Source

Data: © Michael Bauer Research GmbH 2025 based on © Instat, Eurostat.

Boundaries: © Michael Bauer Research GmbH, Nuremberg, Germany, 2025.

Settlement Points: The settlement points were created using 2023 OpenStreetMap Building Footprints, Microsoft Global ML Building Footprints, and the European Commission Global Human Settlement Layer. The buildings were constrained to exclude non-residential housing units and verified using Esri imagery and Esri Street Map Premium Layers. When necessary, multi-unit housing unit values were distributed using a top-down approach based on the Michael Bauer Research Demographic Data.

Change Notes

Market Data are now projections for 2025 (previously 2024). Unemployed Population is shown for 2024 (previously 2023). Population projections at the national level declined by 0.16% compared to former estimates; this difference is attributed to updates to United Nations data based on input data from the Institute of Statistics in Albania. The use of Census 2023 data from official statistics has led to deviations in Education data. The Purchasing Power and Consumer Spending projections in national currency for 2025 show an upward trend due to economic growth and a revision of economic data. The significant changes observed in several consumer spending categories can be attributed to a major revision of the national accounts by the Institute of Statics (INSTAT). Please note that the deviations observed in the values for product groups CS13 to CS16 this year are due to a redefinition of these categories. Due to these changes, comparisons with the last edition are not possible in these groups.

Other Data Notes

None.
