Change Notes

Market Data are now projections for 2025 (previously 2024). Unemployed Population data is shown for 2024 (previously 2023). The use of updated input data from official statistics has led to deviations in Unemployed Population data. The Consumer Spending projection in national currency for 2025 shows variations compared to 2024 with shifts within categories due to new data from official statistics. Please note that the deviations observed in the values for product groups CS13 to CS16 this year are due to a redefinition of these categories. Due to these changes, comparisons with the last edition are not possible in these groups.

Other Data Notes

For reasons of data privacy, in areas with fewer than 10 inhabitants, all data except Population and Household numbers are anonymized. For these areas, all variables simultaneously referring to currency and population are based on the national average and all other variables are set to zero. For Postal Codes, Households by Type are based on the distribution of the respective Gemeinden. Unemployed Population data is based on per capita values of the respective Gemeinden. For 6-digit Postal Codes, Marital Status is based on the distribution of the respective 4-digit Postal Codes.
