Release: February 2026

Data Source

Data: © Michael Bauer Research GmbH 2025 based on © Statistical Service of Cyprus, Eurostat.

Boundaries: © Michael Bauer Research GmbH, Nuremberg, Germany, 2025. Data Source for Digital Boundaries: 2025 Michael Bauer Research GmbH based on © Department of Lands and Surveys.

Settlement Points: The settlement points were created using 2023 OpenStreetMap Building Footprints, Microsoft Global ML Building Footprints, and the European Commission Global Human Settlement Layer. The buildings were constrained to exclude non-residential housing units and verified using Esri imagery and Esri Street Map Premium Layers. When necessary, multi-unit housing unit values were distributed using a top-down approach based on the Michael Bauer Research Demographic Data.

Change Notes

Market Data are now projections for 2025 (previously 2024). Unemployed Population data is shown for 2024 (previously 2023). The use of updated input data from official statistics has led to deviations in Age Groups, Households by Type, Marital Status, and Unemployed Population data. The Purchasing Power and Consumer Spending projections in national currency for 2025 show an upward trend due to a revision of economic data. Please note that the deviations observed in the values for product groups CS13 to CS16 this year are due to a redefinition of these categories. Due to these changes, comparisons with the last edition are not possible in these groups. The new local educational attainment variables provide country-specific education levels or fields; these can vary by country. The existing standardized educational attainment variables use the ISCED (International Standard Classification of Education) levels and fields. These are the same for all countries and regions and are useful for cross-country comparison.

Other Data Notes

Only data for the Greek part of Cyprus available. For reasons of data privacy, in areas with fewer than 10 inhabitants, all data except Population and Household numbers are anonymized. For these areas, all variables simultaneously referring to currency and population are based on the national average and all other variables are set to zero. Marital Status is based on the distribution of the respective Eparchia.
