Change Summary

Changes to geography level names

Former Geography Level Name	New Geography Level Name	Change Details
	NUTS 1	New geography level
	NUTS 2	New geography level
	NUTS 3	New geography level

New Attributes

Attribute Name	Alias Name	Category
EDUC01_CY	2025 Pop 15+/Edu: Without or Presently Attending	Education
EDUC02_CY	2025 Pop 15+/Edu: Secondary General School	Education
EDUC03_CY	2025 Pop 15+/Edu: Intermediate School	Education
EDUC04_CY	2025 Pop 15+/Edu: Fachhochschule/Univ Qualification	Education
EDUC_BASE	2025 Education Attainment Base	Education

Attributes no longer available

None.

Change Notes

Market Data are now projections for 2025 (previously 2024). Unemployed Population data is shown for 2024 (previously 2023). Population projections at the national level declined by -1.20% compared to former estimates; this difference is attributed to the use of the Census 2022 data from the Statistisches Bundesamt of Germany. The use of updated input data from official statistics has led to deviations in Unemployed Population data. The Purchasing Power and Consumer Spending projections in national currency for 2025 show an upward trend due to a revision of economic data. Please note that the deviations observed in the values for product groups CS13 to CS16 this year are due to a redefinition of these categories. Due to these changes, comparisons with the last edition are not possible in these groups. The new local educational attainment variables provide country-specific education levels or fields; these can vary by country. The existing standardized educational attainment variables use the ISCED (International Standard Classification of Education) levels and fields. These are the same for all countries and regions and are useful for cross-country comparison.

The settlement points were updated from Nexiga 2023 Residential Building Centroids to the 2025 Residential

Other Data Notes

For reasons of data privacy, in areas with fewer than 10 inhabitants, all data except Population and Household numbers are anonymized. For these areas, all variables simultaneously referring to currency and population are based on the national average and all other variables are set to zero. For Postal Codes, Marital Status is based on the distribution of the respective Gemeinden. Unemployed Population data is based on per capita values of the respective Gemeinden.
