## Data Source

Data: © Michael Bauer Research GmbH 2025 based on © Statistics Denmark, Eurostat.

Boundaries: © Michael Bauer Research GmbH, Nuremberg, Germany, 2025. Data Source for Digital Boundaries: 2025 Michael Bauer Research GmbH contains © data from Geodatastyrelsen 2016, updated to vintage 2025 by Michael Bauer Research GmbH. © data from the Danish Agency for Data Supply and Infrastructure (datafordeler.dk), Denmark's Administrative Geographical Divisions, February 2024, updated to vintage 2025 by Michael Bauer Research GmbH.

Settlement Points: These settlement points were created using November 2022 OpenStreetMap (OSM) Building Footprints. Esri is a supporter of the OSM project, [www.OpenStreetMap.org](http://www.OpenStreetMap.org). The buildings were constrained to include only residential housing units. The buildings were verified and improved upon using the latest Esri imagery, Geonames point data, and HERE (Esri Street Map Premium Layers (LandArea, BuiltUpArea)). When necessary, household values were distributed evenly onto multiunit residential buildings using a top-down approach with the Michael Bauer Research household values from the lowest level geographies.

## Change Notes

Market Data are now projections for 2025 (previously 2024). Unemployed Population data is shown for 2024 (previously 2023). The use of updated input data from official statistics has led to deviations in Households by Type and Unemployed Population data. The Consumer Spending projection in national currency for 2025 shows variations compared to 2024 with shifts within categories due to new data from official statistics. Please note that the deviations observed in the values for product groups CS13 to CS16 this year are due to a redefinition of these categories. Due to these changes, comparisons with the last edition are not possible in these groups. The new local educational attainment variables provide country-specific education levels or fields; these can vary by country. The existing standardized educational attainment variables use the ISCED (International Standard Classification of Education) levels and fields. These are the same for all countries and regions and are useful for cross-country comparison.

## Other Data Notes

For reasons of data privacy, in areas with fewer than 10 inhabitants, all data except Population and Household numbers are anonymized. For these areas, all variables simultaneously referring to currency and population are based on the national average and all other variables are set to zero. For Postal Codes, Education and Marital Status are based on the distribution of the respective Kommuner. Unemployed Population data is based on per capita values of the respective Kommuner.
