## Change Notes

Market Data are now projections for 2025 (previously 2024). Unemployed Population is shown for 2024 (previously 2023). Population projections at the national level declined by 0.17% compared to former estimates; this difference is attributed to updates to Eurostat data based on input data from Statistics Estonia. Utilization of updated input data from official statistics has led to deviations in Households by Type and the number of Unemployed Population. The Purchasing Power and Consumer Spending projections in national currency for 2025 show an upward trend due to inflation and a revision of economic data. Please note that the deviations observed in the values for product groups CS13 to CS16 this year are due to a redefinition of these categories. Due to these changes, comparisons with the last edition are not possible in these groups.

## Other Data Notes

For reasons of data privacy, in areas with fewer than 10 inhabitants, all data except Population and Household numbers are anonymized. For these areas, all variables simultaneously referring to currency and population are based on the national average and all other variables are set to zero. For Postal Codes, Households are in some areas based on the household size of the respective Asustusused. Age, Gender, Households by Type, Marital Status, and Education are in some areas based on the distribution of the respective Asustusused. Unemployed Population is based on per capita values of the respective Asustusused. Purchasing Power and Consumer Spending are based on per capita values of the respective Omavalitsused.
