None.

Change Notes

Market Data are now projections for 2025 (previously 2024). Population projections at the national level declined by 1.87% compared to former estimates; this difference is attributed to the use of the Census 2023 data from the Agency of Statistics in Kosovo, which has led to deviations in all dependent variables. This decline stems from high emigration, especially among the younger population, economically active people, and persistently low birth rates. Together, these factors are reshaping sociodemographic indicators, including Age Groups, Marital Status, and Education.

Other Data Notes

None.
