## Data Source

Data: © Michael Bauer Research GmbH 2025 based on © Statec, Eurostat.

Boundaries: © Michael Bauer Research GmbH, Nuremberg, Germany, 2025.

Settlement Points: The settlement points were created using 2023 OpenStreetMap Building Footprints. The buildings were constrained to exclude non-residential housing units and verified using Esri imagery and Esri Street Map Premium Layers. When necessary, multi-unit housing unit values were distributed using a top-down approach based on the Michael Bauer Research Demographic Data.

## Change Notes

Market Data are now projections for 2025 (previously 2024). Unemployed Population data is shown for 2024 (previously 2023). The use of updated input data from official statistics has led to deviations in Unemployed Population data. The Consumer Spending projection in national currency for 2025 shows variations compared to 2024 with shifts within categories due to new data from official statistics. Please note that the deviations observed in the values for product groups CS13 to CS16 this year are due to a redefinition of these categories. Due to these changes, comparisons with the last edition are not possible in these groups. The new local educational attainment variables provide country-specific education levels or fields; these can vary by country. The existing standardized educational attainment variables use the ISCED (International Standard Classification of Education) levels and fields. These are the same for all countries and regions and are useful for cross-country comparison.

## Other Data Notes

None.
