## Change Notes

Market Data are now projections for 2025 (previously 2024). Unemployed Population data is shown for 2024 (previously 2023). The Consumer Spending projection in national currency for 2025 shows variations compared to 2024 with shifts within categories due to new data from official statistics. Please note that the deviations observed in the values for product groups CS13 to CS16 this year are due to a redefinition of these categories. Due to these changes, comparisons with the last edition are not possible in these groups. The new local educational attainment variables provide country-specific education levels or fields; these can vary by country. The existing standardized educational attainment variables use the ISCED (International Standard Classification of Education) levels and fields. These are the same for all countries and regions and are useful for cross-country comparison.

## Other Data Notes

For reasons of data privacy, in areas with fewer than 10 inhabitants, all data except Population and Household numbers are anonymized. For these areas, all variables simultaneously referring to currency and population are based on the national average and all other variables are set to zero. For Postal Codes and micro level geographical areas, Education is based on the distribution of the respective Gemeenten. Unemployed Population data is based on per capita values of the respective Gemeenten.
