France

Release: November 2026

Data Source

Data: The data is provided by Esri France. The data comes from official French sources such as INSEE (census, filosofi, BPE), CNAF, DGI. Census data are from 2022 (published in October 2025). Esri France guarantees perfect correspondence with the most recent census geography, and systematically reprocesses previous census years to avoid any missing or incomparable values.

Boundaries: The boundaries are provided by Esri France. The National Geographic Institute (IGN) is the producing body of the geographies of the French borders (at all IRIS levels, municipalities, departments, regions). The geography of January 1, 2024 is the one in force for the 2022 census.

Settlement Points: The 50-meter tiles are provided by Esri France. The data for these tiles is updated annually. The data for the tiles is harmonized with the current census. (2022)
