Change Notes

Market Data are now projections for 2025 (previously 2022). Unemployed Population is shown for 2024 (previously 2021). Utilization of updated input data from official statistics has led to deviations in the Unemployed Population. The Consumer Spending projection in national currency for 2025 shows a significant upward trend due to inflation and economic growth. Please note that the deviations observed in the values for product groups CS13 to CS16 this year are due to a redefinition of these categories. Due to these changes, comparisons with the last edition are not possible in these groups.

No changes were made to these settlement points since the last MBR release.

Other Data Notes

For reasons of data privacy, for areas with less than 10 inhabitants, all given data except Population and Household numbers are anonymized. For these areas, all variables simultaneously referring to currency and population are based on the national average, and all other variables are set to zero.
