Change Notes

Market Data are now projections for 2026 (previously 2024). Population projections at the national level declined by 5.36% compared to former estimates; this difference is attributed to the use of the Census 2025 data from the Institut de la statistique et des études économiques for New Caledonia. The Purchasing Power projection in national currency for 2026 shows a downward trend due to a revision of economic data.

No changes were made to the settlement points since the last release of New Caledonia MBR data.

Other Data Notes

None.
