Argentina

Release: October 2026

Change Notes

Market Data are now projections for 2026 (previously 2024). Unemployed Population data is shown for 2025 (previously 2023). The 'No Education/Illiterate' projection for 2026 shows deviations; this difference is attributed to fluctuations in the underlying age group. The Purchasing Power and Consumer Spending projections in national currency for 2026 show a significant upward trend due to high inflation. Please note that the deviations observed in the values for product groups CS13 to CS16 this year are due to a redefinition of these categories. Due to these changes, comparisons with the last edition are not possible in these groups.

No changes were made to the settlement points since the last release of Argentina MBR data.

Other Data Notes

For reasons of data privacy, in areas with fewer than 10 inhabitants, all data except Population and Household numbers are anonymized. For these areas, all variables simultaneously referring to currency and population are based on the national average and all other variables are set to zero. Micro: Unemployed Population data is based on per capita values of the respective Departamentos.
