Bolivia

Release: October 2026

Change Notes

Market Data are now projections for 2026 (previously 2024). Unemployed Population data is shown for 2025. Population projections at the national level declined by 4.73% compared to former estimates; this difference is attributed to the use of the Census 2024 data from the Instituto Nacional de Estadística in Bolivia. The use of Census 2024 input data from official statistics has led to deviations in Marital Status, and Education data. The Purchasing Power projection in national currency for 2026 shows a significant upward trend due to high inflation.

No changes were made to the settlement points since the last release of Bolivia MBR data.

Other Data Notes

None.
