Change Notes

Market Data are now projections for 2026 (previously 2024). Population projections at the national level declined by 2.59% compared to former estimates; this difference is attributed to updates to United Nations data based on input data from the Instituto Nacional de Estadística for Venezuela, reflecting increased emigration in recent years. The Purchasing Power projection in national currency for 2026 shows a significant upward trend due to extremely high inflation.

No changes were made to the settlement points since the last release of Venezuela MBR data.

Other Data Notes

None.
