Integrating Location and Design

Paul Murphy | GHD
2019 AEC Summit @ ESRI UC

Mapping my story

2016

WASHINGTON

Moving my family here was an adventure for all of us. We made the most of our 2 years in Washington and embraced everything that came our way.

2012

DUBAI

Working on a project in the Middle East was both interesting and rewarding.

2006

ABU DHABI

Living and working in a region is great but being able to return and see the progress of what you have worked on is fulfilling.

PORT MORESBY

Working for the Australian Army in Papua New Guinea

1999

HOME

BRISBANE

Lots of memories made in Brisbane in my youth. Returned in 2016.

1998

MENDI

They say the best way to really know a place is to live there. My career has afforded me this privilege in some very interesting places.

90's

SYDNEY

I've called Sydney home twice in my life.

2014

70's

MELBOURNE

Born in Melbourne and spent my early childhood here.

CANBERRA

Having spent 18 years living in Canberra, it will always be a special place to my family and I.
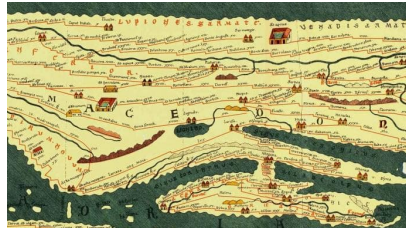

Evolution of location and design
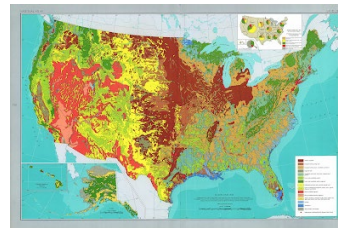

80% of business data contains location information

Location information supports decision making in every area of business

**EMPIRE BUILDING**

**PANDEMIC MANAGEMENT**

ACADEMIC LAND USE WEATHER

GPS EMBEDDED MOBILE DEVICES ON GLOBAL SCALE

**TRADITIONAL DESIGN DISCIPLINES**

FIELDS OF DESIGN BECOMES MORE BROAD

INCREASINGLY COMPLEX INFRASTRUCTURE DESIGN

DESIGN THINKING

"The single biggest competitive advantage"

"Good design is good business"

Design thinking is a methodology that we use to solve any complex problem
