Server administration

The screenshot displays the ArcGIS Server Manager web interface in a browser window. The address bar shows the URL `localhost:6443/arcgis/manager/`. The interface includes a top navigation bar with tabs for **Services**, **Site**, **Security**, and **Logs**. Below this is a sub-navigation bar with **Manage Services**, **OGC Services**, **KML Network Links**, and **Sharing**. The main content area is titled **Folders** and contains a search bar with the text `< Search for services in Site (root) >` and a **Publish Service** button. A left sidebar shows a folder tree with **Site (root)**, **System**, and **Utilities**. The main list displays three services:

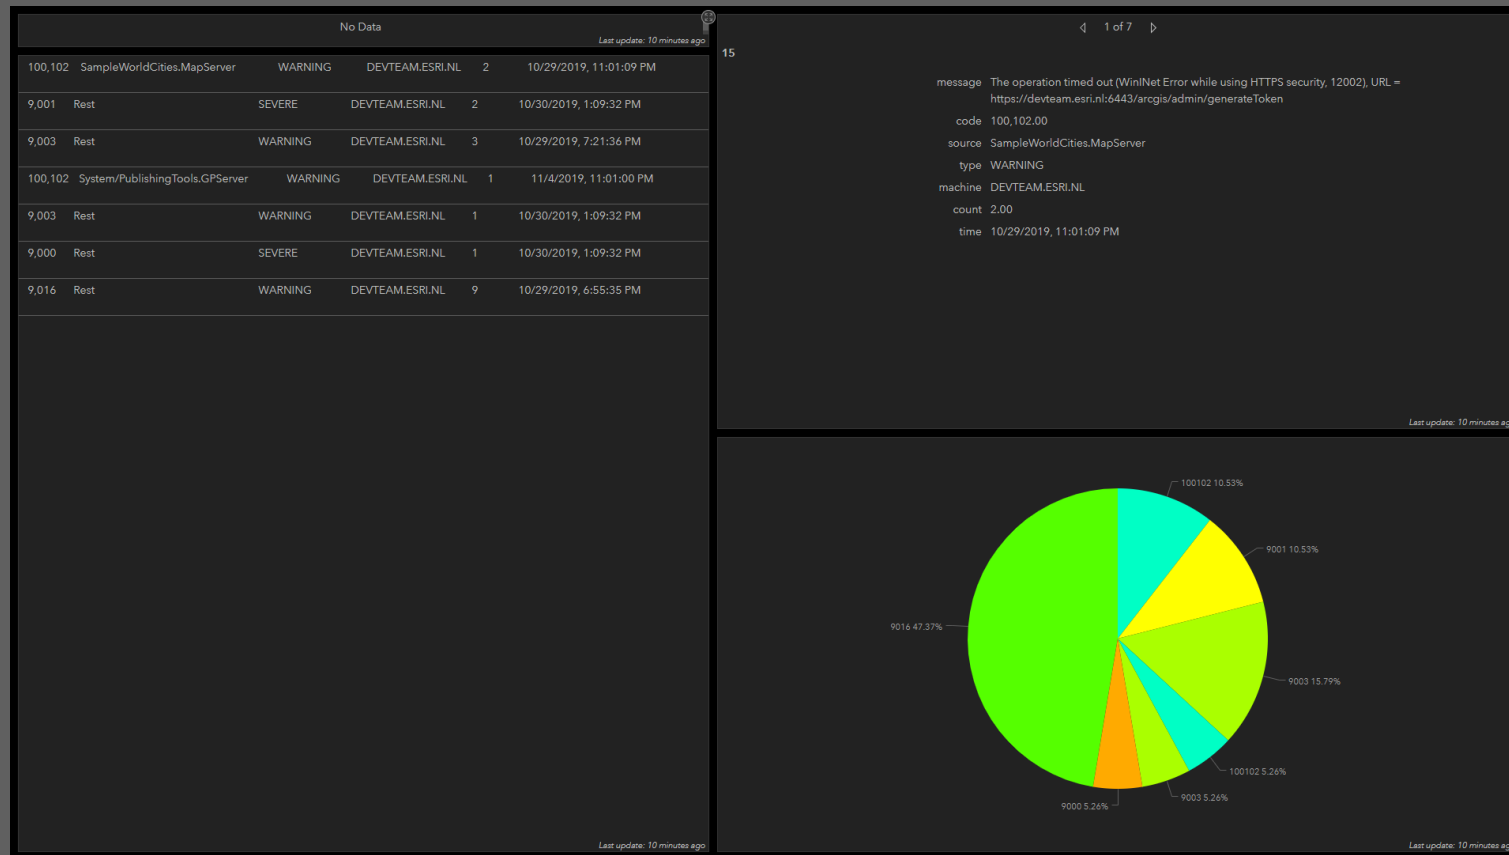

- EuropeanCities** (Map Service):
 - Instance Type: Dedicated
 - Status: Started
 - Instances Running: 1
 - Instances in Use: 0
 - Maximum Instances: 2
- SampleWorldCities** (Map Service):
 - Description: The SampleWorldCities service is provided so you can quickly and easily preview the functionality of the GIS server. Click the thumbnail image to open in a web application. This sample service is optional and can be deleted.
 - Instance Type: Dedicated
 - Status: Started
 - Instances Running: 1
 - Instances in Use: 0
 - Maximum Instances: 1
- WorldDominationPlans** (Map Service):
 - Instance Type: Dedicated
 - Status: Started
 - Instances Running: 1
 - Instances in Use: 0
 - Maximum Instances: 2

At the bottom of the list, there is a pagination control showing `1` of 1 items.
