

The New Normal will never be Normal

We need to see what other's can't...

In this age of data, information and connectivity,

. . . even though we can quantify more of what was previously uncertain,
...it makes apparent how much more we don't know.

What is evident, is that change is happening more quickly and surprisingly...
...across multiple dimensions and scales than we ever thought possible.

We can no longer use the past as a reliable indicator of the future...
. . . and new risks and correlations are emerging...
...in a way that we have not anticipated.

Collaboration in the New Normal

Building resilience for individuals, communities, and nations.
