- Overview of features
- Demos
- Q&A

# Field Operations | Location-enable all phases of field work

#### Plan

Use location to assign and coordinate field activities

Route to your work using your roads, your GIS data even while offline

#### Coordinate

Act on real-time conditions in the field to update worker tasks

#### Understand

See what's happening around you with maps

#### Monitor

Know where workers are and see the progress of work in real-time

Perform data collection and send it back to the office from anywhere

# Integrate with Explorer

**Explorer for ArcGIS** 

App scheme: arcgis-explorer://

(new)

Web scheme: https://explorer.arcgis.app

#### **Third Party Integrations**

- itemID Web Map or MMPK to open/download on launch
- center center point of map Lat/Lon, Address, Feature
- wkid provide wkid for Lat/Lon in non-WGS84 spatial reference
- scale scale to display the map at on launch
- rotation custom map rotation
- markup enable markup tool on launch
- bookmark center map on bookmark instead of using center param
- search quickly execute search for feature in map

**Explorer for ArcGIS: Working with Offline Maps** and Markup

Wednesday, 10-10:45, Demo Theater 9

Field Operations SIG
Wednesday, 11:30-12:30
SDCC Room 29B

Come say hi at the Field Operations area in the Expo!

Draw on your map and share your notes with others.

Use the same notes across multiple maps, and allow

others to contribute to the markup.

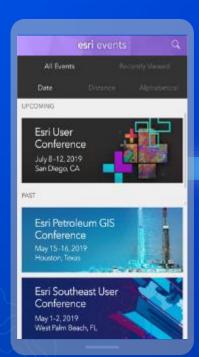

National Park. Want to make the map? Creating a map

to use in the app is just like creating any map for

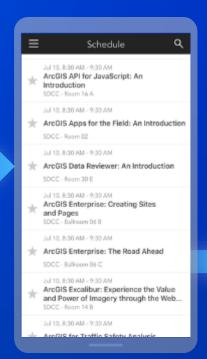

ArcGIS Online or ArcGIS Enterprise.
