Open Data Sites – Linking Disparate Databases for Research Efficiencies

Lucia M. Patterson GIS/Field Specialist – Geologist

Overview

Open data sites have not only opened the door to a new public data resource, but have also created a nexus where many pieces of data can be placed in one location and formatted to meet the needs of, and assist people in, specific industries.

Lets Cut to the Chase...

 - Post-Open Data research methodology
- 4. A Little Number Crunching
- 5. Conclusion

Nevada Division of Minerals (NDOM) AML Program Overview

- NDOM is tasked with inventorying hazardous abandoned mine land features in the state of Nevada, and notifying responsible parties of hazardous conditions so they can secure these features preventing accidental entry by the public, which could result in injury or possibly death.
- In order to do this land research is performed regularly by NDOM staff to identify claim/property owners.

Case example: Patented mining claim (private property) ownership search

Assessor

Welcome to the Storey County Assessor's Office. Our office performs a variety of services on behalf of Storey County businesses and residents. The Assessor's Office is responsible for compliance with all state laws and regulations of the Nevada Tax Commission.

Information Provided

This site provides information regarding property values, and the assessment process. We appreciate your comments and suggestions regarding our website and services in general. Again, welcome to Storey County!

Please note that the Storey County Assessor's Office is closed daily for lunch from 12 - 1 p.m., Monday - Friday.

Assessment Roll

The Storey County Assessor's Office assesses property tax value on all parcels within the county. To properly assess property for tax purposes, the assessor must establish the full market value of your land, and the improvements are assessed at replacement cost less straight line depreciation at 1.5% of year of age.

Search Assessment Records

Search Storey County's Assessment Records

(Fiscal Year 2017-18) Data is updated nightly.

From this page, you can access both Real and Personal Property records, as well as Sales Data. Please click on "Search Assessor Data" below to begin your search.

Searching by Parcel Number

A parcel number is an 8 digit number, usually separated by dashes (ex: 000-000-00). The first 3 numbers represent the parcel book. To search by parcel number, either enter your entire parcel number, excluding dashes, or type the first 3 numbers to bring up all parcels in that book. You can then scroll through the records to find the parcel you are searching for.

Example: type: 00000000 to pull up the precise parcel number or type 000 to pull up all parcels in a book.

Searching by Owner Name

It is important that you type in the name exactly as it is recorded on the assessment record. To simplify the search, you can type the first few letters of the person's last name to bring up all parcels with those letters, then scroll through the records to find the parcel.

Example: recorded parcel name is: Theodore Smith. If you type in Ted Smith, the record will not be found. If you type in Smi, all parcels with owners whose last names start with "Smi" will appear.

If you have any questions or difficulties in locating an assessment or sales record, please contact us. We are happy to assist you.

Nevada Mining Claim Listings

Mining has played a significant role in Nevada's history and continues to be a major contributor to Nevada's economy. Over one million mining claims have been located in the state since the mining law of 1872 was passed. As of June 21, 2019 there were 204,588 active mining claims within the state.

Claim Listing data as of June 21, 2019

Claim density does not accurately reflect acreage claimed, due to association placer claims. Also, small miners claims may not be shown between October and February due to the fact that the assessment year is still set to the previous assessment year in LR2000

To report broken links or to be notified when this data is upddated email: 🔀 Impatterson@minerals.nv.gov

"Claims Per Section" and "Claim Points" are linked to appropriate reports on the BLM's LR2000 Database, just select a section or a claim.

"Mining Districts" are linked to their corresponding Mineral Connection Sheet on the BLM's Land Records Search, just select a mining district.

Land & Mineral System Reports

The Bureau of Land Management (BLM) administers more public land - over 245 million surface acres - than any other Federal agency in the United States. Most of this land is located in the 12 Western states, including Alaska. The BLM's Legacy Rehost System, called LR2000, provides reports on BLM land and mineral use authorizations for oil, gas, and geothermal leasing, rights-of-way, coal and other mineral development, land and mineral title, mining claims, withdrawals, classifications, and more on federal lands or on federal mineral estate. The LR2000 enables users to access the same information over the Internet as in the BLM State Office Information Access Centers.

LR2000 provides access to the following systems. To run reports you will need to know which of the following systems the information you are looking for is in:

- Case Recordation (CR) contains information on land and mineral use authorizations, title, withdrawals, classifications, and more issued by the BLM on federal actions affecting public lands of the United States.
- Mining Claim Recordation (MC) contains information on unpatented mining claims located on federal lands.
- Status (ST) contains information on withdrawals, land classifications, and title transfer documents issued mainly before 1984. Title documents transferred lands in and out of government ownership.
- Legal Land Description (LLD) contains cadastral survey data and other information such as state, county, BLM field office, and surface management agencies (BLM, Forest Service, etc.).

Please see the options on the left for further information about the LR2000 system, as well as informational resources such as user guides and reference materials.

Note: -LR2000 is not available from 1:00 AM - 3:00 AM Mountain Time.

-Mining Claimants can now pay their annual maintenance fees online at https://payp.blm.gov/eppcore/home.

✓ Purpose		
This report lists all the mining claims (a administrative state.	ctive, closed, and/or pending)	in a specific geographic location. This report can be retrieved for any
Report		
Instructions:		
Asterisk (*) indicate	s Mandatory Criteria - please sele	ect from the list of values.
All entries must be i Either select one or	more values from the list OR type	a in value(s)
Separate values wit	h a semicolon ; if entering more th	han one.
	ONLY ONE Maridian Taumahin	Pance (MTR) OR Meridian Teurskin Pance Section (MTRC) ***
Choose ONE and	ONLY ONE - Mendian Township	Range (MTR) -OR- Mendian Township Range Section (MTRS).
MTR must be entered	d as:	
 2 digits for Meridian 	<space>5 characters for Townshi</space>	p <space>5 characters for Range</space>
MTRS must be enter	ed as:	
 2 digits for Meridian 	<space>5 characters for Townshi</space>	p <space>5 characters for Range<space>3 digits for Section</space></space>
MTR Examples:		
• 08 T1N R1E	is entered as	08 0010N 0010E
• 08 T29N R35E	is entered as	08 0290N 0350E
• 08 T29N R100W	is entered as	08 0290N 1000W
MTRS Examples:		
• 08 T1N R1E Sec 1	is entered as	08 0010N 0010E 001
• 08 T29N R35E Sec	10 is entered as	08 0290N 0350E 010
IF it is necessary to e	enter a half township or half range	, the last zero is replaced with 2.
For example:		,
• 14 T3 1/2 N R28E	is entered as	14 0032N 0280E
• 14 T3 1/2 N R28 1/2	2 E is entered as	14 0032N 0282E

See Reference Codes link above for a valid Meridian Code. All other criteria are optional.

Pub MC Geo Index Report

Ouser GuideReference Codes

Purpose

This index is used to list claims by geographic area. The report includes geographic information (meridian, township, range, section, subdivision), geographical state, county, field office, serial number, lead serial number, case type, claim name/number, claimant(s), county book/page, location date, last assessment year, and a case closed date when applicable.

Conclusion

The Nevada Division of Minerals open data site has evolved not only to be a source of data but also a utility for research which does not require any specialized software, additional data files, or knowledge of reports and query designs.

The short cuts available on the open data site not only allow the novice to perform land research, but also enable the professionals to complete the job more efficiently.....resulting in increased time efficiencies and significant cost savings.

Thank you!

NEVADA DIVISION OF AINERALS Thank you!
