# SCEMD: Trying to Reason with Hurricane Season using Esri Technology

Charlie Kaufman – GIS Manager

[ckaufman@emd.sc.gov](mailto:ckaufman@emd.sc.gov)

Melissa Potter – Chief of Operations Support

[mpotter@emd.sc.gov](mailto:mpotter@emd.sc.gov)

# Introduction

# SCEMD

- South Carolina Emergency Management Division (SCEMD) is the coordinating agency responsible for the statewide emergency management program, and is responsible for coordinating the preparation for, response to, and recovery from any major disaster in SC.
- The GIS Department falls under the Operations Support Section as it supplies GIS data and maps to all aspects of SCEMD operations.

# Hurricane Florence

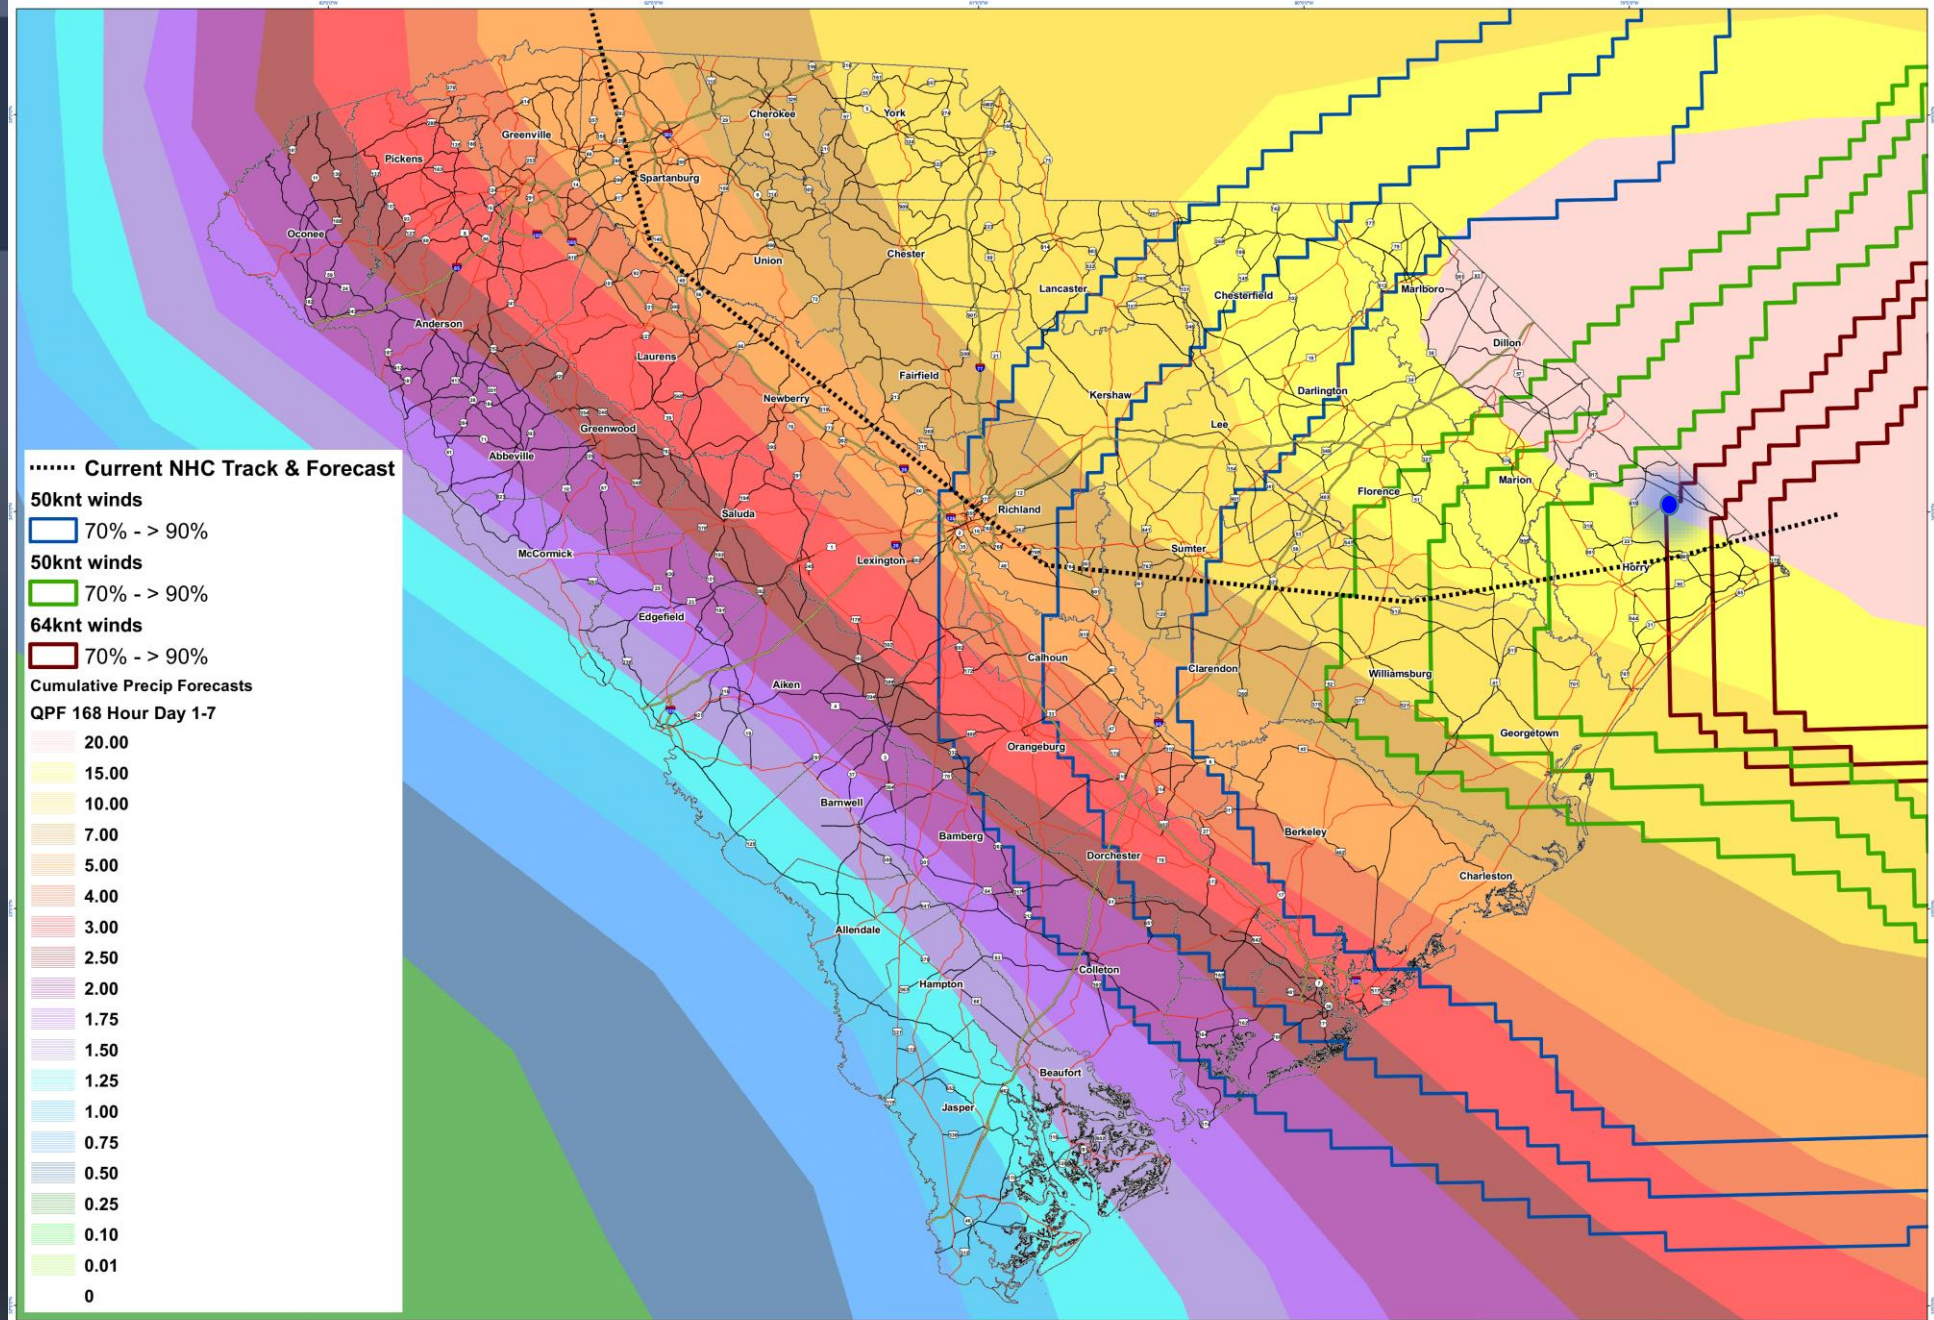

# SCEMD

- Hurricane Florence was a powerful hurricane that caused severe damage in the Carolinas in September 2018, primarily as a result of freshwater flooding.
- Florence rapidly intensified in September becoming a Cat 4 hurricane.
- Made landfall in NC as a Cat 1 storm on Sept 14<sup>th</sup>.

E-mail: ckaufman@emd.sc.gov  
Charlie Kaufman -- 9/14/2018

# Introduction

# SCEMD

- When Hurricane Florence threatened and then impacted the Carolinas, SCEMD utilized Esri software in multiple ways.
  - Common Operating Picture - Palmetto
  - ArcMap / Static Mapping
  - Arc Online / Web Apps

# Common Operating Picture Palmetto

# SCEMD

- Palmetto: SC's Statewide COP.
  - Launched in June of 2017, Florence's activation saw the largest amount of simultaneous users ~ 1,500.
- Fully customizable application that utilizes Esri's Web App Builder.
  - Integrates all types of data feeds, and allows users situational awareness of an incident.
- "Mobile First" design allows users to share information on their mobile devices in the field.
- Available to all State, County , and Local emergency managers.

- SCEMD at the time had not moved to ArcPro – used Arc 10.5.1.
- 36 different ArcMap files were created and updated.
- These files served as the templates for the final 66 GIS maps that were published.
- 130 maps were printed from the plotter.

- The SC National Guard (SCNG) provided GIS support throughout the Hurricane Florence activation.
  - SCNG created briefing apps that our Plans section used to brief out on each day.
  - SCNG also created an advanced Search and Rescue Grid application to assist the National Guard with impacts and damage assessment.

# We Had Help

# SCEMD

- As with the past 3 years of natural disasters, Esri's Disaster Response Program (DRP) provided support.
  - Technical – both in house and online.
  - Project based – ingested outside agency flood models.
  - Kept me relatively sane!
- Renee Bernstein & Cameron Amrine came to SCEMD during the activation and were lifesavers!
  - **THANK YOU!**

# Summary

# SCEMD

- SCEMD was activated for a record 33 days, and GIS played a role in supporting all aspects of the activation.
- SCEMD's GIS department saw requests for all types of GIS outputs from interactive web applications to the more traditional static maps.
- The goal of the GIS department is to provide better data to the emergency managers and responders to help them make better plans and decisions.
