|----------------------------------------------------------------------------------------------------|-----------|
| Acknowledgments .....                                                                              | vii       |
| Introduction .....                                                                                 | ix        |
| <b>Part 1: Implementing ArcGIS Enterprise .....</b>                                                | <b>1</b>  |
| Chapter 1: Understanding the prerequisites .....                                                   | 3         |
| Tutorial 1: Examine system patterns .....                                                          | 11        |
| Chapter 2: Understanding the ArcGIS Enterprise base deployment .....                               | 13        |
| Tutorial 2: Explore the ArcGIS Enterprise portal and server manager .....                          | 20        |
| Chapter 3: Deploying ArcGIS Enterprise .....                                                       | 23        |
| Tutorial 3: Explore your ArcGIS Enterprise deployment .....                                        | 32        |
| Chapter 4: Introduction to ArcGIS Enterprise security best practices .....                         | 41        |
| Tutorial 4: Import certificates into the ArcGIS Enterprise administrative end points .....         | 49        |
| Chapter 5: Going beyond the ArcGIS Enterprise base deployment .....                                | 57        |
| Tutorial 5: Investigate distributed computing in ArcGIS Enterprise .....                           | 67        |
| <b>Part 2: Administering ArcGIS Enterprise .....</b>                                               | <b>71</b> |
| Chapter 6: Getting familiar with the ArcGIS Enterprise portal .....                                | 73        |
| Tutorial 6: Familiarize yourself with the ArcGIS Enterprise organization<br>portal interface ..... | 81        |
| Chapter 7: Managing users in ArcGIS Enterprise .....                                               | 89        |
| Tutorial 7: Create a new member with appropriate privileges .....                                  | 95        |
| Chapter 8: Managing content in the ArcGIS Enterprise portal .....                                  | 103       |
| Tutorial 8: Use ArcGIS Enterprise to manage content items .....                                    | 115       |
| Chapter 9: Publishing ArcGIS-managed data .....                                                    | 123       |
| Tutorial 9: Create a hosted feature layer .....                                                    | 129       |
| Chapter 10: Publishing user-managed data .....                                                     | 133       |
| Tutorial 10: Create a data store in ArcGIS Enterprise .....                                        | 138       |

|                                                                                                   |            |
|---------------------------------------------------------------------------------------------------|------------|
| <b>Part 3: Introduction to common workflows in ArcGIS Enterprise</b>                              | <b>141</b> |
| Chapter 11: Publishing data to ArcGIS Enterprise                                                  | 143        |
| Tutorial 11: Publish a web feature service from ArcGIS Pro                                        | 144        |
| Chapter 12: Editing against feature services                                                      | 155        |
| Tutorial 12: Practice multiuser editing over the web                                              | 156        |
| Chapter 13: Performing spatial analysis                                                           | 167        |
| Tutorial 13: Perform a school accessibility analysis                                              | 168        |
| Chapter 14: Communicating your analysis results in a dashboard                                    | 183        |
| Tutorial 14: Make a dashboard for public presentation                                             | 185        |
| Chapter 15: Establishing a distributed collaboration                                              | 197        |
| Tutorial 15: Share data through a distributed collaboration                                       | 199        |
| <b>Part 4: Maintaining and troubleshooting in ArcGIS Enterprise</b>                               | <b>211</b> |
| Chapter 16: Performance best practices                                                            | 213        |
| Tutorial 16: Investigate system performance                                                       | 227        |
| Chapter 17: Troubleshooting in ArcGIS Enterprise                                                  | 231        |
| Tutorial 17: Troubleshoot technical issues                                                        | 243        |
| Chapter 18: Backing up and restoring ArcGIS Enterprise                                            | 249        |
| Tutorial 18: Investigate ArcGIS Enterprise settings for business continuity and disaster recovery | 257        |
| Chapter 19: Patching ArcGIS Enterprise                                                            | 261        |
| Tutorial 19: Install a patch for ArcGIS Enterprise                                                | 268        |
| Chapter 20: Upgrading ArcGIS Enterprise                                                           | 271        |
| Tutorial 20: Prepare for an upgrade                                                               | 279        |
| Conclusion                                                                                        | 283        |
