

Contents

Preface vii

Acknowledgments ix

Chapter 1: A world of 3D maps 1

- Introduction 1
- Realistic: City of Boston 2
- Thematic: 1789 sailing ship route 4
- Mixed reality: Stranded sea lions through time 6
- Summary 8

Chapter 2: Why 3D? 9

- Introduction 9
- Maps versus scenes 10
- Opportunities available in 3D 12
- Challenges with 3D 17
- Summary 25

Chapter 3: Anatomy of a 3D scene 26

- How many types of scenes are there? 26
- Data sources for scenes 35
- 3D layer functions 39
- Summary 40

Chapter 4: Authoring for distance and scale 41

- Scale categories 42
- Techniques for authoring for a specific scale or LOD 45
- Techniques for authoring across scales or LODs 51
- Mixing content from different scales or LODs 53
- Summary 54

Chapter 5: Delivery formats 55

- Sharing 3D content as a static or printed image 56
- Sharing 3D content as a video 62
- Sharing 3D content as an interactive 3D view 67
- Summary 71

Chapter 6: Using surfaces 72

- What is a surface? 72
- The role of surfaces in a scene 74
- Surface types 74
- Surface resolution 76
- Geometric effects for surfaces 80
- Symbology for surfaces 86
- Performance concerns 92
- Summary 93

Chapter 7: Displaying draped content 94

- Resolution 95
- Influence of the surface 97
- Connecting multiple LODs 98
- Draping vector data as vectors 101
- Draped text and labels 102
- Summary 103

Chapter 8: Displaying features—geometry types, base heights, and anchor points 105

- 3D objects in the scene 105
- Core source geometry types 106
- Base-height modes 110
- Per-feature z-values 112
- Thematic z-values 115
- Anchor points 116
- Summary 121

Chapter 9: Displaying features—form, rotation, and scaling 123

- Form: Billboards 123
- Form: Recognizable shapes 125
- Form: Extrusion 127
- Rotation 130
- Scaling 135
- Summary 139

Chapter 10: Displaying features—textures and materials 140

- Options for texturing a 3D object 141
- Realistic texturing 144
- Thematic texturing 149
- Dynamic texturing 152
- Summary 154

Chapter 11: Displaying features—animated symbols 156

- Use cases for animated symbols 156
- Types of animated effects 159
- Summary 172

Chapter 12: Displaying text and labels 174

- Text drawing 174
- Text symbology 176
- Text placement 178
- Text orientation and direction 184
- Multiple LODs 188
- Summary 190

Chapter 13: Displaying volumetric content 192

- Volumetric content in ArcGIS 192
- Voxel display 193
- Point cloud display 201
- Integrated mesh display 209
- Summary 212

Chapter 14: Temporal content in 3D 214

- Time-enabled content 215
- Static temporal display 217
- Animated temporal display 219
- Space–time cube display 222
- Summary 228

Chapter 15: Configuring the scene 231

- Limiting the content 231
- Vertical exaggeration 235
- Lighting effects 237
- Environmental effects 240
- Visual styling effects 244
- Summary 246

Chapter 16: Exploring the scene 247

- Orientation 247
- Navigation 250
- Data exploration 253
- Summary 258

Afterword 259
