

# Contents

*Foreword* ..... *xiii*  
*Introduction*.....*xvii*  
*How to use this book*.....*xxi*

**Part 1: Disaster management** **1**

---

**Chapter 1: Applying the US National Grid in emergency response** **3**

*Software: ArcGIS® Pro 3.4*

Overview ..... 3  
Background and situational context ..... 4  
Exercise workflow 1 ..... 5  
    1. Visualize the extent of a disaster ..... 5  
    2. Obtain the grid system..... 8  
    3. Obtain population data ..... 10  
    4. Perform the analysis ..... 13  
Interpretation of analysis ..... 15  
Applying and extending your skills ..... 16

**Chapter 2: Geospatial intelligence for disaster management: Lessons from Hurricane Dorian** **19**

*Software: ArcGIS Pro 3.4*

Overview ..... 19  
Background and situational context ..... 20  
Exercise workflow 2 ..... 21  
    1. Add data to a map ..... 21  
    2. Customize symbology ..... 22  
    3. Perform a prehurricane analysis ..... 24  
    4. Perform a posthurricane analysis ..... 27  
    5. Disseminate analytic findings..... 30  
Interpretation of analysis ..... 31  
Applying and extending your skills ..... 32

**Chapter 3: Introduction to fire intelligence—wildfires 35**

*Software: ArcGIS Online*

Overview ..... 35

Background and situational context ..... 36

Exercise workflow 3 ..... 38

    1. Add fire hazard layers to a map ..... 38

    2. Add population data ..... 41

    3. Add infrastructure data..... 42

    4. Analyze the data ..... 43

Interpretation of analysis ..... 46

Applying and extending your skills..... 47

**Chapter 4: Creating facility outline graphics and gridded reference graphics at multiple spatial scales in ArcGIS AllSource 49**

*Software: ArcGIS AllSource™ 1.2*

Overview ..... 49

Background and situational context ..... 50

Exercise workflow 4 ..... 50

    Gridded reference graphics at a local scale ..... 51

        1. Add data ..... 51

        2. Extract a feature ..... 52

        3. Create grids and labels..... 54

        4. Apply symbology ..... 55

        5. Disseminate the product ..... 57

    Gridded reference graphics at a regional scale ..... 60

        1. Create a project and zoom to a bookmark..... 60

        2. Extract a feature ..... 61

        3. Create grids and labels..... 64

        4. Apply symbology ..... 67

        5. Disseminate the product ..... 68

        6. Add a table ..... 69

Interpretation of analysis ..... 71

Applying and extending your skills..... 72

**Chapter 5: Mapping flooded urban areas from the Nova Kakhovka, Ukraine, dam destruction 75**

*Software: ArcGIS Pro 3.4*

Overview ..... 75

Background and situational context ..... 77

Exercise workflow 5 ..... 77

    1. Detect flooded areas..... 78

    2. Apply orbit correction and remove thermal noise ..... 81

    3. Create a composite raster layer ..... 86

    4. Apply fusion and analyze the data..... 91

Interpretation of analysis ..... 93

Applying and extending your skills..... 94

**Part 2: Climate challenges** **97**

---

**Chapter 6: Accelerating electric vehicle uptake: Locating charging stations in an urban context** **99**

*Software: ArcGIS Pro 3.4*

- Overview ..... 99
- Background and situational context ..... 100
- Exercise workflow 6 ..... 101
  - 1. Identify areas that already have access to EV charging infrastructure ..... 102
  - 2. Identify areas within 250 feet of an existing road centerline ..... 104
  - 3. Identify areas where at least one-third of the housing stock includes multifamily housing units ..... 105
  - 4. Identify disadvantaged communities using the NEVI data ..... 106
  - 5. Intersect the common areas where criteria are met ..... 107
  - 6. Remove from consideration areas near existing stations..... 109
- Interpretation of analysis ..... 109
- Applying and extending your skills ..... 110

**Chapter 7: Object detection and segmentation of trees using Text SAM in ArcGIS Online** **113**

*Software: ArcGIS Pro 3.4, ArcGIS Online, ArcGIS Image*

- Overview ..... 113
- Background and situational context ..... 114
- Exercise workflow 7 ..... 115
  - 1. Load the imagery and add metadata ..... 115
  - 2. Download and run the Text SAM model ..... 117
- Interpretation of analysis ..... 119
- Applying and extending your skills ..... 120

**Chapter 8: Estimating populations vulnerable to flood risk in Florida between 2001 and 2019** **123**

*Software: ArcGIS Notebooks*

- Overview ..... 123
- Background and situational context ..... 124
- Exercise workflow 8 ..... 125
  - 1. Load the data ..... 125
  - 2. Use ArcGIS Notebooks to estimate urban flood exposure ..... 126
  - 3. Use ArcGIS Notebooks to estimate exposed populations ..... 136
- Interpretation of analysis ..... 140
- Applying and extending your skills ..... 141

**Chapter 9: Evaluating shoreline properties threatened with future sea level rise in coastal Florida** **145**

*Software: ArcGIS Notebooks*

- Overview ..... 145
- Background and situational context ..... 146

Exercise workflow 9 .....	147
1. Load the data.....	147
2. Run the code.....	148
Interpretation of analysis .....	160
Applying and extending your skills.....	161

**Part 3: Social justice and human rights** **163**

---

**Chapter 10: Introduction to environmental justice monitoring: The case of air pollution in Los Angeles** **165**

*Software: ArcGIS Online*

Overview .....	165
Background and situational context .....	166
Exercise workflow 10 .....	168
1. Prepare the exposure assessment .....	168
2. Update the symbology .....	169
3. Explore and modify the CES 4.0 dataset to examine diesel PM .....	170
4. Explore and modify the EPA GHGRP dataset .....	171
5. Analyze the GHG emission buffer.....	172
6. Update the buffer analysis symbology .....	173
7. Calculate GHG emissions .....	174
8. Update GHG emission calculations symbology.....	175
9. Review the results.....	176
10. Visualize GHG emissions against asthma rates .....	177
11. Visualize GHG emissions against poverty rates .....	178
12. Create a bivariate map .....	179
Interpretation of analysis .....	180
Applying and extending your skills.....	181

**Chapter 11: Using geospatial information dashboards to visualize multidimensional poverty** **183**

*Software: ArcGIS Pro 3.4, ArcGIS Dashboards, ArcGIS Online*

Overview .....	183
Background and situational context .....	184
Exercise workflow 11 .....	186
1. Download and review the data.....	186
2. Prepare a map in ArcGIS Pro .....	186
3. Build dashboards and share data.....	193
Interpretation of analysis .....	203
Applying and extending your skills.....	204

**Chapter 12: Cultural impacts of the war in Ukraine** **207**

*Software: ArcGIS Pro 3.4*

Overview .....	207
Background and situational context .....	208

Exercise workflow 12 .....	208
1. Add data to a map .....	208
2. Explore and select cultural variables for analysis .....	209
3. Transform and visualize your data .....	211
4. Create cartographic products .....	219
Interpretation of analysis .....	223
Applying and extending your skills .....	224
<b>Chapter 13: Monitoring human rights violations using satellite remote sensing</b>	<b>227</b>
<i>Software: ArcGIS Pro 3.4</i>	
Overview .....	227
Background and situational context .....	228
Exercise workflow 13 .....	229
1. Import imagery and data into ArcGIS Pro .....	229
2. Calculate backscatter intensity change .....	232
3. Evaluate damages .....	235
Interpretation of analysis .....	235
Applying and extending your skills .....	237
<b>Part 4: Safer seas</b>	<b>241</b>
<hr/>	
<b>Chapter 14: Assessing illegal fishing and monitoring maritime activities with dashboards</b>	<b>243</b>
<i>Software: ArcGIS Online, ArcGIS Dashboards</i>	
Overview .....	243
Background and situational context .....	244
Exercise workflow 14 .....	245
1. Import and join the datasets .....	245
2. Visualize and quantify patterns .....	250
3. Create a dashboard .....	255
Interpretation of analysis .....	261
Applying and extending your skills .....	261
<b>Chapter 15: Detecting ship encounters at sea with GIS</b>	<b>265</b>
<i>Software: ArcGIS Pro 3.4</i>	
Overview .....	265
Background and situational context .....	266
Exercise workflow 15 .....	266
1. Explore and analyze data for a 24-hour period .....	266
2. Create maritime traffic density maps .....	270
3. Create a ship encounter detection model .....	273
Interpretation of analysis .....	276
Applying and extending your skills .....	282

**Part 5: Global security** **285**

**Chapter 16: Aggression or defense? Assessing Russian intentions in the Arctic** **287**

*Software: ArcGIS Pro 3.4*

Overview .....	287
Background and situational context .....	288
Exercise workflow 16 .....	290
1. Set up your map .....	290
2. Explore the study area .....	292
3. Perform an exploratory analysis of the sea ice extent .....	294
4. Map potential Russian interests in the Arctic with live data .....	296
5. Map sea ice change over time .....	299
6. Examine Russian movement or intentions in the region .....	301
Interpretation of analysis .....	305
Applying and extending your skills .....	306

**Chapter 17: Activity-based intelligence analysis: Geospatial-temporal analysis with big, diverse datasets** **313**

*Software: ArcGIS Pro 3.4*

Overview .....	313
Background and situational context .....	314
Crime scenario and analysis .....	316
Exercise workflow 17 .....	316
1. Examine the data .....	316
2. Add data and prepare data layers for analysis .....	317
3. Perform an initial analysis of the suspect’s activities .....	323
4. Further analyze the activities of Combs and his associate .....	327
5. Conduct a final investigation .....	331
Interpretation of analysis .....	332
Applying and extending your skills .....	333

**Chapter 18: Quantifying and mapping land use and land cover change for HSGI** **335**

*Software: ArcGIS Pro 3.4*

Overview .....	335
Background and situational context .....	336
Exercise workflow 18 .....	337
1. Calculate a raster change analysis manually .....	338
2. Calculate a raster change analysis using ArcGIS Pro .....	339
3. Calculate an automated raster change analysis .....	342
4. Reclassify data and visualize results .....	345
5. Reclassify results and identify change .....	348
Interpretation of analysis .....	350
Applying and extending your skills .....	351

**Chapter 19: Predictive military geography of Poland 355***Software: ArcGIS Pro 3.4, ArcGIS Online, ArcGIS StoryMaps<sup>SM</sup>*

Overview .....	355
Background and situational context .....	356
Exercise workflow 19 .....	356
1. Add data and isolate the study area .....	357
2. Add data and convert it to raster format .....	361
3. Perform a spatial analysis of a study area .....	362
4. Build a model in ModelBuilder and reclassify the data .....	368
5. Customize symbology .....	375
6. Create a story in ArcGIS StoryMaps .....	376
Interpretation of analysis .....	378
Applying and extending your skills .....	378

**Chapter 20: Processing advanced sensor imagery in ArcGIS Drone2Map for use in modeling and simulation intelligence activities 381***Software: ArcGIS Online, ArcGIS Drone2Map<sup>®</sup> 2024.2*

Overview .....	381
Background and situational context .....	382
Exercise workflow 20 .....	383
1. Process RGB imagery with Drone2Map .....	383
2. Disseminate your findings in ArcGIS Online .....	391
Interpretation of analysis .....	394

<i>Data credits</i> .....	401
---------------------------	-----
