

CONTENTS

Introduction *vii*

CHAPTER 1 ArcGIS as a planning system **1**

Foundational principles of ArcGIS as a planning system 2
Components of ArcGIS as a planning system 8
Conclusion 12

CHAPTER 2 Planning and design **14**

The role of GIS in current planning 14
The game plan 24
Making GIS approachable for planners 25

CHAPTER 3 Future-proof planning **27**

GIS and the practice of long-range planning 27
Visualizing and monitoring progress 38
The game plan 40
Making GIS useful in long-range planning 41

CHAPTER 4 Stakeholder engagement **44**

GIS brings communities into the conversation 44
The game plan 52
Bringing stakeholders together through geography 53

CHAPTER 5 Economic mobility **54**

Economic mobility as a planning priority 54
Gaining buy-in for plans 60
The game plan 61
Economic mobility strategies and the importance of location 63

CHAPTER 6 Compliance **64**

Achieving compliance with a geospatial approach 64
Why compliance needs GIS 65
The game plan 74
Bringing together GIS and compliance 75

CHAPTER 7 A planning digital twin 77

The changing nature of planning: Why a new approach is needed 77
The geospatial foundation of planning digital twins 81
What planning digital twins look like in practice 83
Building a planning digital twin: A practical approach 91
The future of planning: From static plans to living systems 95

CHAPTER 8 AI in planning 97

A leader's role in AI 97
Using AI in planning workflows 102
Preparing your department for AI 103

CHAPTER 9 Building a GIS program for planning 106

Creating a foundation for a geographic approach 106
