<i>Foreword to the second edition</i>	<i>vii</i>
<i>Foreword to the first edition</i>	<i>ix</i>
<i>Acknowledgments</i>	<i>xi</i>
Chapter 1: Introducing GIS Analysis	1
What is GIS analysis?	3
Understanding geographic features	5
Understanding geographic attributes	14
Chapter 2: Mapping Where Things Are	23
Why map where things are?	24
Deciding what to map	25
Preparing your data	27
Making your map	29
Analyzing geographic patterns	46
Chapter 3: Mapping the Most and Least	51
Why map the most and least?	52
What do you need to map?	53
Understanding quantities	57
Creating classes	63
Making a map	79
Looking for patterns	99
Chapter 4: Mapping Density	105
Why map density?	106
Deciding what to map	107
Two ways of mapping density	109
Mapping density for defined areas	113
Creating a density surface	118
Chapter 5: Finding What's Inside	133
Why map what's inside?	134
Defining your analysis	134
Three ways of finding what's inside	145
Drawing areas and features	148
Selecting features inside an area	153
Overlaying areas and features	160

Chapter 6: Finding What's Nearby	181
Why map what's nearby?	182
Defining your analysis	182
Three ways of finding what's nearby	189
Using straight-line distance	192
Measuring distance or cost over a network	217
Calculating cost over a geographic surface	229
Chapter 7: Mapping Change	241
Why map change?	242
Defining your analysis	242
Three ways of mapping change	257
Creating a time series	259
Creating a tracking map	268
Measuring and mapping change	275
<i>Where to get more information</i>	289
<i>Data credits</i>	294
<i>Index</i>	295
