<i>Foreword</i>	<i>xi</i>
<i>Preface</i>	<i>xiii</i>
<i>Acknowledgments</i>	<i>xvii</i>
Chapter 1: Get started with Web GIS	1
Web GIS and the geospatial cloud	2
New-generation Web GIS architecture and trends	7
Web GIS information model: Users, web layers, maps, and apps	11
Geotagged images—an increasingly popular GIS data source	19
Tutorial 1	22
1.1 Create an ArcGIS® Online trial account	23
1.2 Create a hosted feature layer from geotagged photos	24
1.3 Add fields to your feature layer and edit the attributes	28
1.4 Create a web map	30
1.5 Create a web app using a template	33
Questions and answers	37
Assignment	39
Chapter 2: Hosted feature layers and storytelling with GIS	41
Feature layers: The most common type of operational layers	42
Smart mapping, pop-ups, and ArcGIS Arcade	44
ArcGIS Living Atlas of the World	48
Storytelling using Web GIS and principles of user experience design	49
Tutorial 2	56
2.1 Create a feature layer from a CSV file	56
2.2 Configure layer style	58
2.3 Configure layer pop-ups using ArcGIS Arcade	61
2.4 Add images and charts to your layer pop-ups	64
2.5 Use layers from ArcGIS Living Atlas of the World	67
2.6 Create a story map	68
Questions and answers	75
Assignment	77

Chapter 3: ArcGIS Experience Builder and ArcGIS Web AppBuilder	81
Basics of Web AppBuilder and Experience Builder	82
Using the builders to create web apps	85
Editions of Web AppBuilder and Experience Builder	88
Tutorial 3	89
3.1 Create a web app using Web AppBuilder	90
3.2 Configure chart-type widgets	96
3.3 Configure filter-type widgets	101
3.4 Use Experience Builder to create a web app	108
3.5 Configure actions and menus	115
Questions and answers	120
Assignment	123
Chapter 4: Mobile GIS	125
Mobile GIS: Concepts and advantages	127
Feature layer edit settings, views, and feature templates	129
Mobile app development strategies	132
ArcGIS native apps for field and indoor operations	134
VR, AR, and other popular types of apps and frontiers	143
Tutorial 4	145
4.1 Design a survey for ArcGIS Survey123	146
4.2 Use Survey123 to collect data and review the data collected	152
4.3 Create editable feature layers, domains, and web maps for ArcGIS Collector	156
4.4 Collect data using Collector	162
4.5 Create an ArcGIS QuickCapture project	165
4.6 Collect data using QuickCapture	168
4.7 Prepare data for use with AuGeo	170
4.8 Explore your surroundings in AR	173
Questions and answers	176
Assignments	177

Chapter 5: Tile layers and on-premises Web GIS	181
The need for on-premises and hybrid Web GIS	183
ArcGIS Enterprise components and deployment	184
Raster tile, vector tile, map image layers, and publishing strategy	189
Workflow to share web layers from ArcGIS Pro	197
Tutorial 5	200
5.1 Add a portal connection in ArcGIS Pro	200
5.2 Publish a vector tile layer	202
5.3 Publish a raster tile layer	209
5.4 Compare raster and vector tile layers in a web app	211
5.5 Edit vector tile layer styles	215
Questions and answers	220
Assignment	221
Chapter 6: Spatiotemporal data and real-time GIS	223
Spatiotemporal data, IoT, and the demand for real-time GIS basics	224
Cloud, server, and client-side technologies for real-time GIS	229
Animate time-series data	236
Tutorial 6	238
6.1 Create a web map with real-time layers	239
6.2 Create a dashboard app	245
6.3 Add actions and targets to your dashboard	253
6.4 Create a time-enabled feature layer	256
6.5 Animate time-series data in web maps and web apps	259
Questions and answers	263
Assignments	264

Chapter 7: 3D web scenes	267
Basics of 3D GIS	268
Web scenes and web scene layers	272
3D technologies in VR, indoor GIS, and urban planning	279
Tutorial 7	284
7.1 Explore web scenes using ArcGIS Scene Viewer	284
7.2 Create a thematic web scene	284
7.3 Create a web scene using feature layers and 3D object symbols	288
7.4 Configure elevation to visualize underground and in-the-sky features	294
7.5 Enhance the web scene by editing 2D	299
7.6 Performing basic 3D analysis in Scene Viewer	301
Questions and answers	305
Assignment	308
Chapter 8: Spatial analysis and geoprocessing	311
Spatial analysis, spatial data science, and ArcGIS web tools overview	313
ArcGIS web tools for standard analysis	316
ArcGIS web tools for big data analysis	319
Custom web tools and geoprocessing services	323
Access to ArcGIS web tools using ArcGIS Insights SM and ArcGIS Notebooks	325
Artificial intelligence in ArcGIS	329
Tutorial 8	334
8.1 Create a web app using the Web AppBuilder Analysis widget	336
8.2 Perform analysis using the Web AppBuilder Analysis widget	341
8.3 (Optional) Design a geoprocessing tool	351
8.4 (Optional) Publish a custom web tool	355
8.5 (Optional) Use your custom web tool in Web AppBuilder	363
8.6 (Optional) Perform big data analysis using ArcGIS Enterprise	366
8.7 (Optional) Get started with Notebooks	370
Questions and answers	375
Assignments	377

Chapter 9: Image service and online raster analysis	381
by Dr. Jie Chang	
Raster and imagery	383
Image service	387
Raster function and online analysis	394
Deep learning in image analysis	397
Tutorial 9	400
9.1 Create a web map in ArcGIS Online using a Living Atlas image service	401
9.2 Create a web app using the Image Mask configurable app	406
9.3 (Optional) Explore a multispectral image and create a raster function template file in ArcGIS Pro	412
9.4 (Optional) Share an image service to Portal for ArcGIS	423
Questions and answers	429
Assignments	432
Chapter 10: Web GIS programming with ArcGIS API for JavaScript	435
Web GIS programming overview	436
JavaScript, HTML, and CSS	440
ArcGIS API for JavaScript	443
Develop apps using JavaScript API	449
Tutorial 10	454
10.1 Explore the basics of 2D views and 3D views	454
10.2 Load web maps and web scenes	456
10.3 Debug JavaScript and monitor HTTP traffic	457
10.4 Incorporate widgets in 2D and 3D views	464
10.5 Handle mouse events to display Google Street View and pop-ups	468
10.6 Use layers, renderers, and symbols for drive-through simulation in 2D and 3D views	472
Questions and answers	477
Assignment	478
