*Preface* ix  
*Preface to the 2012 edition* xi  
*Introduction* xv

**Part I Cartographic modeling conventions 1**

**Chapter 1 Data 3**

1-1 Cartographic models 4  
1-2 Map layers 6  
1-3 Titles 6  
1-4 Metadata 7  
1-5 Zones 8  
1-6 Labels 8  
1-7 Values 8  
1-8 Locations 10  
1-9 Coordinates 24  
1-10 Questions 27

**Chapter 2 Data processing 31**

2-1 Operations 32  
2-2 Procedures 34  
2-3 Questions 36

**Chapter 3 Data-processing control 39**

3-1 Statements 40  
3-2 Programs 41  
3-3 Questions 42

<b>Part II</b>	<b>Cartographic modeling capabilities</b>	<b>43</b>
	<b>Chapter 4 Characterizing individual locations</b>	<b>45</b>
4-1	Functions of a single value	46
4-2	Functions of multiple values	50
4-3	Questions	65
	<b>Chapter 5 Characterizing locations within neighborhoods</b>	<b>69</b>
5-1	Functions of immediate neighborhoods	70
5-2	Functions of extended neighborhoods	83
5-3	Questions	108
	<b>Chapter 6 Characterizing locations within zones</b>	<b>113</b>
6-1	Functions of entire zones	114
6-2	Functions of sub-zones	117
6-3	Questions	120
<b>Part III</b>	<b>Cartographic modeling techniques</b>	<b>123</b>
	<b>Chapter 7 Descriptive modeling</b>	<b>125</b>
7-1	Analysis of cartographic position	126
7-2	Analysis of cartographic form	132
7-3	Synthesis of cartographic characteristics	141
7-4	Questions	144
	<b>Chapter 8 Prescriptive modeling</b>	<b>147</b>
8-1	Atomistic allocation	149
8-2	Holistic allocation	151
8-3	Questions	164
	<b>Appendix Cartographic modeling operations</b>	<b>167</b>
A-1	FocalFUNCTION operations on extended neighborhoods	167
A-2	FocalFUNCTION operations on immediate neighborhoods	171
A-3	LocalFUNCTION operations	172
A-4	ZonalFUNCTION operations	174
